

# CrisisGo Safety CheckIn

Assess Risk and Organize Recovery

CRISISGO

## Challenges

Companies are facing unprecedented challenges maintaining staff safety during and following the current pandemic situation. CrisisGo Safety CheckIn is helping companies to immediately assess risks and organize recovery while constantly monitoring safety threats and assisting staff during and post-incidents; including a pandemic, natural disaster and other major disruptions. CrisisGo Safety CheckIn helps your organization gather important information for the safety and well-being of all your stakeholders.

## CrisisGo Safety CheckIn

**Incoming data can be used to inform leadership when offices and locations should be re-opened based on the spread or control of an illness in the area. It can be used after a natural disaster – like a tornado, earthquake, wildfire or hurricane – to assess the impact to community and staff members and when it is appropriate to reopen.**

**Local, real-time data to make more informed decisions**

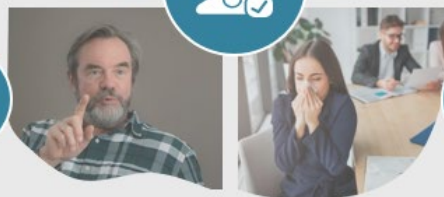

**Report Escalation for Severe Status**

**COMMAND CENTER**

**Intelligent Survey**

**Keep Communication with People**

**RECIPIENTS**

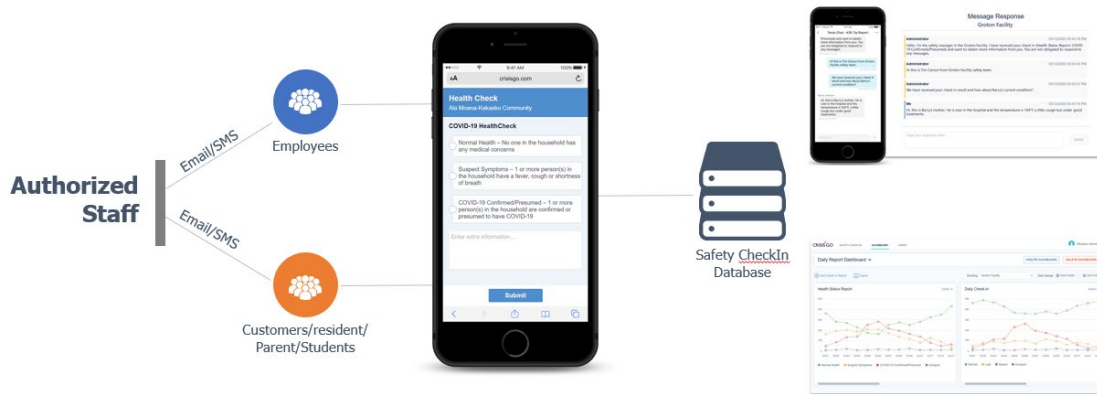

**Reports and Analytics**

**ON-DEMAND | NON-INTRUSIVE | FRICTIONLESS**

## Features

- Frictionless: Import your contact list and launch your Safety CheckIn in minutes
- Intelligent Surveys supporting decision tree and instant alerting
- Automatic Escalation to Subject Matter Experts and instant communication with Recipient on secured Web chat
- Safety audit trail and heatmap (dashboard)
- Quickly determine which employee requires assistance

## Use Cases

### Remote Workers

Deliver work-at-home directives, assistance and updated information. Manage logistics of distributing required equipment, technology and more.

### Essential Worker Status

Coordinate necessary frontline workers, check availability status and ensure coverage for essential parts of your business.

### Resource Survey

Quickly assess quantity, distribution and availability of staff, fleet and vehicles, medical supplies, protective equipment and more.

### Morale

Quickly assess workforce morale and well-being with regular or ad-hoc surveys. Collect suggestions for workplace culture enhancements for continuous improvement.

### Questions and Concerns

Enable Human Resources and Management to respond to incoming calls regarding health-related or worker safety concerns.
