CrisisGo's Safe2SpeakUP App for Students

What is Safe2SpeakUP?

The Safe2SpeakUP app is the student companion to CrisisGo's Bully & Tips reporting tool. Using Safe2SpeakUP allows students to report bully-related activity involving themselves or their friends. Students can additionally submit tips or reports about incidents at school to their school's safety team. Safe2SpeakUP users can message with the school's safety team that oversees bully-related incidents, as well as message groups that their school district has granted them permission to access.
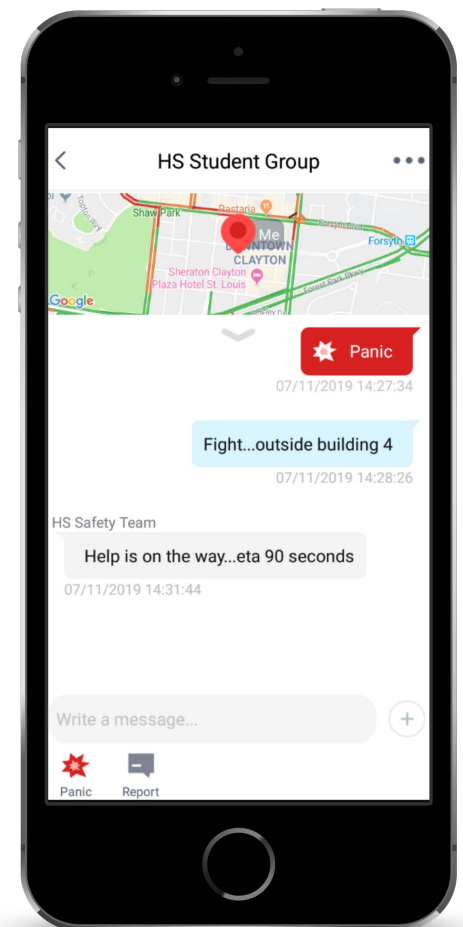

How Students Get the Safe2SpeakUP App:

Students interested in Safe2SpeakUP can simply download the app from Google Play, Apple's App Store, or Chrome Web Store.

Student accounts for the app will be created through your school's implementation process, and the school's administration will be able to provide students with their username and password. Once a student logs in, they will automatically have access to the tips and groups available.

Students Can Use the Safe2SpeakUP App to:

- Anonymously report bullying and bully-related activity.

- Report safety issues with multi-media reporting options.

- Communicate with the school safety team during an incident.

- Learn about safety risks and solutions.

- Respond to safety Check In prompts sent by school administrators.

- Activate a digital panic button and drop a GPS pin of their location during emergencies.

*All activities through Safe2SpeakUP are recorded for reporting purposes. When selected, anonymity is ALWAYS preserved.
