Senior MI/BI Developer– Sydney, August 2017 (12 Month Maximum Term Contract)

Over 13 years DUAL Australia has become one of the largest independent Underwriting agencies in Australia by focusing on creating unique products and solutions for the SME market. We're a company committed to having fun at work while getting the job done. As a company we're known in the industry as a group dedicated to giving back to the community by partnering with charitable groups and actively participating in fundraising events.

We are looking for an experienced, proactive and qualified Senior MI/BI Developer who is ready to jump in and assist our IS team in Sydney on an initial 12 month contract.

This role will utilise a wide range of technologies and skills to provide efficient, reliable reporting across multiple systems.

Experience using Microsoft SQL/ SSRS and data visualisation tools such as Tableau are a must in this role in addition to advanced Excel skills. Suitable candidates will also have experience in writing Postgres queries, data analysis, the ability to write Oracle SQL queries , exposure to the core principles of SDLC models (in particular waterfall), code management procedures and testing.

Moreover, experience working closely with business stakeholders and the ability to communicate ideas in both a technical and user-friendly language will be necessary for success in this role.

Reporting to the Operations Manager and IS Team Lead, your duties will include;

- Day to day database maintenance of the SSRS reporting server and associated reports
- Database administration and connection maintenance and ETL Management
- Management of data visualization tools and associated database extracts
- Working with business stakeholders (internal and external) to identify data requirements
- Development of reports in Microsoft SQL
- Management of underwriting system database connections
- Creation of SSRS subscriptions for data cleansing purposes

As a suitable candidate you will have a minimum of three to five years experience in a development role as well as a Bachelors Degree in Computing Science (or similar).

If this sounds like you, apply now by sending your Cover Letter and resume to our HR Assistant, Hayley Diamond (hr@dualaustralia.com.au).
