

DECISION LENS ACTIVITY LOG

Always Stay Up-to-date with Your Portfolio Changes

The Activity Log helps Portfolio Owners and Reviewers know exactly when and where changes have been made to your portfolios. Adjustments including the addition, removal, or alteration of items such as Criteria, Alternatives, and Ratings are all categorized by time. You'll be able to see the changes made, who made it, and the time and date it took place. You can even search by user name, activity, or both. The Portfolio Overview page has also been revamped with a highly informative new layout and workflow for a better user experience.

Key Benefits for Your Organization

- Know exactly when and where changes have been made to the portfolio
- Search on key activity changes or specific individuals
- Understand high-level portfolio statistics with the new Portfolio Overview layout
- New Getting Started section helps move you through your portfolio prioritization
