

DECISION LENS

Strategic Government Solutions for Army

At the end of the day, we got a credible result that was more analytically sound in less than half the time”

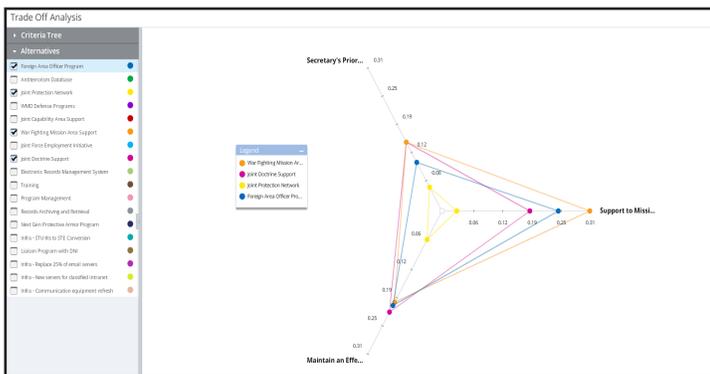

Joint Chiefs of Staff

The Intelligent Portfolio

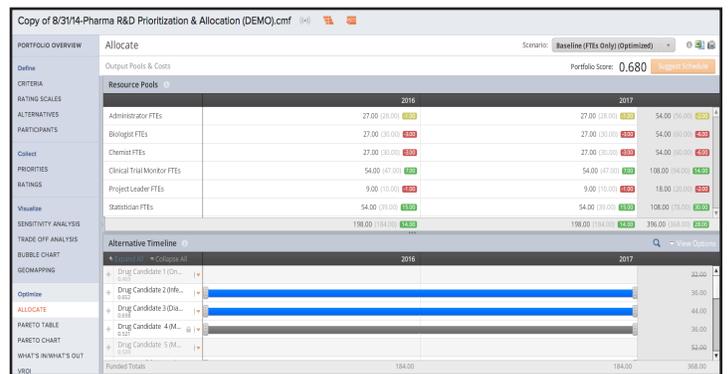

Decision Lens is a cloud-based software solution delivering the complete process for identifying, prioritizing, analyzing, and measuring which investments, projects, and resources will deliver the highest returns. Decision Lens combines valuable organizational data with experts’ judgements to establish priorities in an efficient, intelligent framework. Decision Lens’ streamlined and automated solution saves the Army countless hours and dollars while simultaneously providing the optimal value for your initiatives. Competency areas include: Army Modernization, G8 Resource Allocation, G-357 Strategic Prioritization, Risk/Trade off Analysis, S&T/Innovation Prioritization, and Workforce Planning.

- Maximize the value of every dollar, operate transparently, and wisely use the resources entrusted to you.
- Align resources to the highest value projects.
- Instantly re-allocate resources as priorities and funding change.

Visualize performance on key decision drivers and define the trade space

Optimize financial and human resources with multi-year planning capabilities

Federal Customer Profiles - Helping You Fight Tonight

U.S Army Training and Doctrine Command (TRADOC)

Strategic Prioritization, Budgeting, and Resource Allocation

TRADOC leverages Decision Lens at HQ, across 8 COE's (Centers of Excellence), and other component commands to prioritize strategic initiatives and allocate financial and manpower resources intelligently against those priorities. Supported use cases include, but are not limited to: Mission/Training 1-n prioritization, G-8 resource allocation, Cost-Benefits (C-BA) & Alternatives (AoA) analysis, Contracts prioritization, and Skills/Tasks prioritization.

Army Chief of Staff for Installation Management (ACSIM)

Capabilities Prioritization and POM Optimization

ACSIM is prioritizing capabilities that support Army Installation operations from law enforcement to family support to environmental quality services. With Decision Lens, ACSIM is able to run what-if scenarios by removing or adding capabilities and visualizing the impact on the mission, family support, and leadership priorities.

U.S. Army Special Operations Command

Strategic Planning and Budget Optimization

USASOC commands both active-duty and Army Reserve special operations forces. They use Decision Lens for budgeting, planning, and operations activities. USASOC can evaluate numerous competing resource alternatives among participants with Decision Lens. They can easily tie resource decisions to actual dollars in multiple major force programs and budget lines.

Decision Lens is a  **FedRAMP** Compliant Organization
