

Transform Your Entire Institution With Jenzabar One: An Executive Overview

Jenzabar®

We upgraded from Jenzabar PX so that we could stay with Jenzabar and modernize our ERP within budget. With a seamless implementation, we went live on time and on budget. The trainers and support team have been so supportive and responsive. The Jenzabar solution is flexible, easy to use, and users can now run their own reports. And, because the solution was configured to our business practices, we didn't have to change our processes to accommodate the new system.

Executive Overview

The Digital Transformation of Higher Education

The way students consume higher education has forever changed. Today's learner finds that "going to college" often involves multiple educational advancements such as online and distance learning, competency-based education, gainful employment as a measurement of outcome, the shift away from semester-based enrollment, credit mobility and more.

Brought up on Amazon®, Netflix®, and instant information access, your students are looking for a more personalized and connected experience with complete flexibility on how, when, and where they learn. They are mobile- and tech-savvy and expect their educational institution to be too. Powering the new student's experience requires the kind of leadership and technology that keeps institutions agile, connected, engaged, and responsive.

In 21st century higher education, technology is an essential strategic resource that is instrumental to driving your school in fulfilling its mission. That means that your IT operations must do more than keep the computers and networks running; they must grow and change at the speed of digital innovation.

Education CIOs must innovate their administrative systems by modernizing or replacing legacy systems. This will enable digital transformation, support new business models, and meet consumerized student and faculty expectations.

Terri-Lynn Thayer, VP Analyst, and Robert Yancello, Sr Director Analyst

As your technology partner, Jenzabar is committed to ensuring your institution rises to the challenges of modern education. We'll make sure you have the mission-critical software, services, and strategies to surpass the demands of your constituents. We'll help your institution navigate the tectonic shift away from long-established business practices with ease. In keeping with our 'No Client Left Behind' philosophy, Jenzabar PX will continue to be supported and enhanced for the foreseeable future. However, as a Jenzabar PX institution, you are uniquely positioned to take advantage of higher education's technology platform: Jenzabar One.

Jenzabar One: For the New Generation

Jenzabar One is a flexible, cloud-ready platform exclusive to higher education. It's a powerful suite of technology products and services that provide your campus with mobile-friendly solutions to achieve both institutional and student success. And it's so much more.

Together with your peers, we have created a unified higher education platform that modernizes your institution to fully support the new student. Jenzabar One is a direct result of the transformational way we are responding to our clients' needs and the changing higher education landscape. Built with the most advanced technology available, Jenzabar One ensures you have the right architecture and tools to support the increased technological dependency across your entire enterprise—today and well into the future.

Jenzabar One is:

Configurable

- ▶ The highly configurable nature of Jenzabar One eliminates the need to customize.
- ▶ Simplifies upgrades and updates with minimal disruption.
- ▶ Built for all school types, running different types of programs for different constituents across higher education.

Scalable

- ▶ Designed for institutions with 500-25,000 enrollments.
- ▶ Able to scale as you grow.

Proven

- ▶ Ready now! Unlike products being written from scratch, Jenzabar student information systems have been the most selected on the market for the last 6-7 years.*

Innovative

- ▶ Cloud-ready, web-based, and mobile-friendly.

*Based on total new institution sales of higher education student information systems during the 2011–2018 period.

Student-Centric

Going to college may be significantly different now compared to what it was just a short while ago, but your goal remains unchanged—deliver a world-class education to transition your students into successful alumni. How your institution uses technology to engage your students is key to accomplishing that goal. Jenzabar One sets the foundation for modern higher education best practices and helps every student at your institution access the resources needed to reach his/her full potential. Jenzabar One offers mobile convenience that's easy to use by students and staff alike. Jenzabar One's modern user interface provides a user-centric experience for students and staff on any mobile device. The integrated workflow and automation in Jenzabar One streamlines your institutional operations so everyone stays focused on helping students succeed.

Nimble

To remain viable in a highly competitive market, institutions must easily adapt to changing conditions. Jenzabar One provides the flexibility needed for your ever-changing business models. With our flexible solution, institutions can effectively manage both traditional and non-traditional students all in one integrated system. This approach helps reduce the time and cost investment needed to support all of your academic programs and reduces the need for multiple systems across your organization.

Extending onprem systems with cloud services and combining them with other cloud-based systems will decrease the burden of maintenance on the institutional IT staff and enable more opportunities for innovation.

Trusted Microsoft Platform

Jenzabar One is natively developed on the Microsoft® technology stack. Why is that important to you? Microsoft is a robust, reliable and trusted technology. The Microsoft SQL server ensures that our Jenzabar One customers have the scalability, reliability, and security that modern campuses require.

Jenzabar One uses .NET as its software framework, which is a vibrant, growing, and tested platform. Developed by Microsoft, .NET is a dependable framework that provides formidable information security. Governments, public agencies, and privately held organizations rely on .NET for its security features.

Benefits of Cloud Computing

Jenzabar One is cloud-ready and soon to be cloud-native. There are benefits gained from being hosted in the cloud. These benefits fall into three distinct categories.

► Cost savings (capital and operational)

- Colleges and universities are finding that using Jenzabar Cloud services is less expensive than on-premise hosting.

► Agility

- Cloud provides the ability to make changes quickly to succeed in a rapidly changing environment.

► Engagement

- Solutions in the cloud enhance the ability to connect quickly with students.
-

The nexus of social, mobile, cloud, and information forces is creating an increasingly student-centric atmosphere in which students have a heightened expectation for service. In many cases, this represents a tectonic shift away from long-established business practices. ... CIOs are ideally positioned to promote institutional strategies that address current pain points, as well as providing long-term road maps with a goal of establishing integrated business practices and coherent data that can enable the rich analytics essential for sustainable transformation and growth.

Gartner Research

Jenzabar One: A Unified Cloud-Ready Higher Ed Platform

Digital transformation in higher education is here. Jenzabar One modernizes your organization to support the new student.

Jenzabar Student: (Selected feature highlights)

Registration

- ▶ Customized student registration experience based on student criteria (e.g. assigned plan, degree audit, course search). Students can plan and register via an interactive planning grid.
- ▶ Robust student registration filtering and editing options with streamlined workflows throughout.

Advising

- ▶ Highly interactive advisee roster includes student list filtering with multiple batch work items.
- ▶ Advising cycle calendars provide structure and accountability. Easily manage advisee appointments with student portal requests.

Student Life

- ▶ Customizable lottery system supports student housing room selection and automated roommate and room selection based on student preferences. Visual metrics for quick insights into housing process.
- ▶ Collect multiple online reports for student conduct issues and then merge them into one incident. Include files, photos, or documentation.
- ▶ Automatically generate charges in Account Receivable for sanction fines.
- ▶ Track student activity participation.

Events

- ▶ Full-featured Events module helps plan, create, and schedule effective events including:
 - **Reserving facilities**
 - **Administering events**
 - **Creating and managing rosters**
 - **Managing registrations, including online registration forms**
 - **Providing pre- and post-event lists for comparative analytics**
- ▶ Automatic workflows and standard task and messaging features keep the communication flowing across campus and among attendees and administrators.

Jenzabar Finance: (Selected feature highlights)

Accounts Receivable

- ▶ Parent accounts portal allows parents to access student account information, make payments, and review account statements and 1098-Ts.
- ▶ Student accounts portal allows students to review account balances and financial documents, as well as make payments.
- ▶ Automated workflow to refund payments for students with a credit balance.

General Ledger

- ▶ Ability to use project codes to track activity across financial transactions over multiple time periods (months, years). Activity includes encumbered, unposted and posted balances, and budgetary amounts associated with a project code.
- ▶ Project manager assignment enables project monitoring with budgetary warnings, as well as assigning project start and expiration dates. Users can assign permissions for each project code to allow users access to view project information across the campus.

Budget

- ▶ Multi-level budget rollup and approval hierarchies to reflect institution's resource allocation and budgetary approval process.
- ▶ Ability to approve or deny one or more submitted worksheets at a time. Communication regarding reason for approval/denial can be made in bulk and provided via a comment or attachment.

Making the Move to Jenzabar One

High-Value Solution

Jenzabar One is the most cost-effective path for you to move to a modern ERP. Upon signing a contract for Jenzabar One, your Jenzabar PX maintenance will no longer be billed, which means no double maintenance fees. Many Jenzabar PX customers see a long-term cost savings moving to Jenzabar One.

Leverage Your Current Jenzabar Investment

If you already use any of the components of Jenzabar One, such as JICS, Jenzabar eLearning, or Jenzabar Retention, they will need to be reviewed, remapped, and reconfigured so they can interface with the upgraded components of the Jenzabar One solution. However, your users across campus will still see the familiar interface and features they have grown accustomed to.

Our Experience Eases Data Migration

The Jenzabar professional services team leverages its knowledge and experience with Jenzabar PX and Jenzabar One when converting your data. This experience not only reduces the risk of a costly data conversion, it also reduces the number of hours needed to migrate data and implement the software.

Our Jenzabar PX professional services team provides guidance and support during the data mapping and conversion process. Their experience and hands-on support not only simplifies the Jenzabar PX to Jenzabar One implementation process, it provides you with a peace of mind that your data conversion will be successful.

No Client Left Behind

Jenzabar PX will continue to be supported and enhanced for the foreseeable future, but when you're ready to update, let us show you Jenzabar One: the best, functionally comprehensive Web-based solution on the market today!

The Value of a Jenzabar Implementation

The Jenzabar One implementation methodology launches all modules concurrently. This methodology naturally results in an overall lower cost of implementation. A concurrent go-live allows us to reduce the large number of implementation hours and trips to campus for repeat training typically required for a phased implementation.

The Jenzabar implementation methodology also eliminates the need (and associated costs) of temporary data bridges from an old system to the new system.

Other benefits of our concurrent implementation methodology:

- ▶ Staff do not need to enter data in both systems. This can be inefficient and create data-entry inconsistencies.
- ▶ Everyone at the institution moves forward on the same day.
- ▶ On time and on budget.
- ▶ Lower cost.

Simple Path to Jenzabar One

When you're ready to move to Jenzabar One, your implementation team will be with you every step of the way to ensure your go-live is a success for everyone across campus.

Next Steps

Jenzabar's singular focus is maximizing your success. We exclusively serve institutions of higher education, which gives us a unique perspective on the industry, allowing us to plan for change and ensure you have the technology, knowledge, and strategies to deliver the exceptional educational experience your students deserve. With a deep understanding of the complex issues facing you today, our mission is your mission.

With so much riding on your higher education institution, you owe it to your constituents to ensure that your school is doing its part to meet the demand for affordable, high-quality education. Jenzabar One will help get you there. Let's schedule a demonstration on your campus today.

Your Jenzabar Account Team is ready to talk to you! Visit jenzabar.com/PXtoJ1 to take your next step!
