

Deliver engaging online learning experiences that delight students and staff

Today's higher education landscape is more diverse than ever before. Modern students come with high expectations for personalized attention, online access, and the social connection that drives our world. Empower your instructors to create dynamic learning environments that improve learning outcomes with Jenzabar eLearning. Adopt innovative methods of delivering and enhancing a digital educational experience, so you can excite and engage today's learners and attract a broader range of students.

Jenzabar's eLearning solution provides the tools necessary to develop an engaging online community. Students and faculty can interact and collaborate in ways that are not possible with traditional in-classroom methods, including accessing their education 24x7 from wherever they are. Jenzabar eLearning is powerful yet easy to learn, with seamless integration so you are up and running in no time.

At a Glance

Jenzabar eLearning is a powerful yet easy-to-use learning management system that won't break your budget. Jenzabar eLearning delivers all the tools your faculty needs over the interface your students want, giving you the flexibility to deliver courses in the way modern students learn.

Integration with your other key technologies and IMS certifications puts Jenzabar eLearning at the forefront of interoperability and industry-leading technologies.

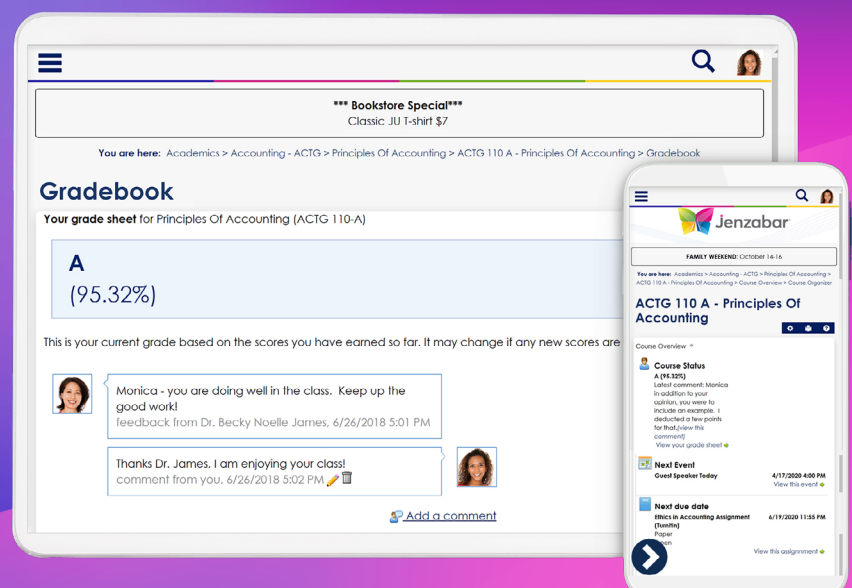

Advantages

"Jenzabar eLearning has enabled us to broaden our offerings. Our students stay in contact with their instructors 24x7. Jenzabar eLearning has benefited all our constituents, from the student, to the staff, to the instructors."

MARIE GARDNER

Associate Dean for the Online Campus
 Neosho County Community College

Jenzabar one

A Unified Cloud Platform for Higher Ed

Jenzabar One is a modern cloud platform built exclusively for higher education. As a unified suite of solutions and services, Jenzabar One powers your digital campus, drives institutional and student success, and accelerates innovation and growth.

Jenzabar SONIS

Powerful technology.
Amazingly affordable.

Jenzabar SONIS is a powerful student information system that unites campus operations on a single platform. With Jenzabar SONIS, growing and specialized institutions can overcome resource constraints, empower their students' success, and achieve their missions.

Selective release of coursework and content

Using this web-based solution, instructors set the opening date/time for content and materials for the entire course. Additionally, scheduling page posts, units, handouts, and bookmarks by date or by student progress are all at their fingertips. Jenzabar eLearning supports "work at your own pace," remedial, competency-based education, and fast-track coursework—from pre-test directly to final exam paths.

Discussion forums and blogs

Jenzabar eLearning includes added features for forum assignments, including individual due dates for submissions and replies. Communications are targeted to specific students via the blog page and a class calendar, which contains all course meetings and optionally displays due dates of assignments.

Course and testing options

On a course-by-course basis adding, removing, and setting up your own course structure is simple. Instructors can easily build quizzes and self-assessments, leverage various online testing options, or print exams for in-person testing. A faculty file cabinet stores test questions, assignments, and other materials to be used repeatedly.

Class pace and organization

The course page groups assignments, events, news, discussion, and resources by unit. Instructors can efficiently move all or selected content, including setting dates from one course to another, and mapping templates to courses, including default grade scales and rubrics.

Class assistant support

Give TAs, academic deans, and instructional technologists various levels of control within a class without being listed as an instructor.

Give faculty the tools they want

Inspire engaged learning with increased teacher-student collaboration. Jenzabar eLearning provides a variety of coursework types to support all the ways faculty teach and assess students.

- ▶ Enable collaborative learning
- ▶ Organize or copy courses, support term rollover, and leverage rich template mapping
- ▶ Utilize a centralized gradebook
- ▶ Access usage statistics and course evaluations
- ▶ Store test questions and leverage analytics through a faculty file cabinet
- ▶ Support chat, discussion forums, and online meetings
- ▶ Enable more accessibility via WCAG 2.0 AA development
- ▶ Selectively release coursework and content
- ▶ Seamlessly exchange data with your administrative systems
- ▶ Access a free tier of Jenzabar Online Meetings for real-time collaboration
- ▶ IMS Learning Tools Interoperability and (LTI) Advantage Complete
