

DATA SHEET

DIGITALLY ENGAGE WITH DOCUMENTS AND CONTENT

USE CASES

- Correspondence
- Onboarding
- Claims
- Enrollment
- Quotes
- Collateral
- Welcome Kits
- Surveys
- Guided Sales
- Consents
- Proposals
- Reports
- Agreements
- PDF forms
- Account Open
- Loan Applications

SERVICES & SUPPORT

Train: Guide developers toward best practices for building their own microservices and applications.

Augment: Support internal IT staff with services to help accelerate your project.

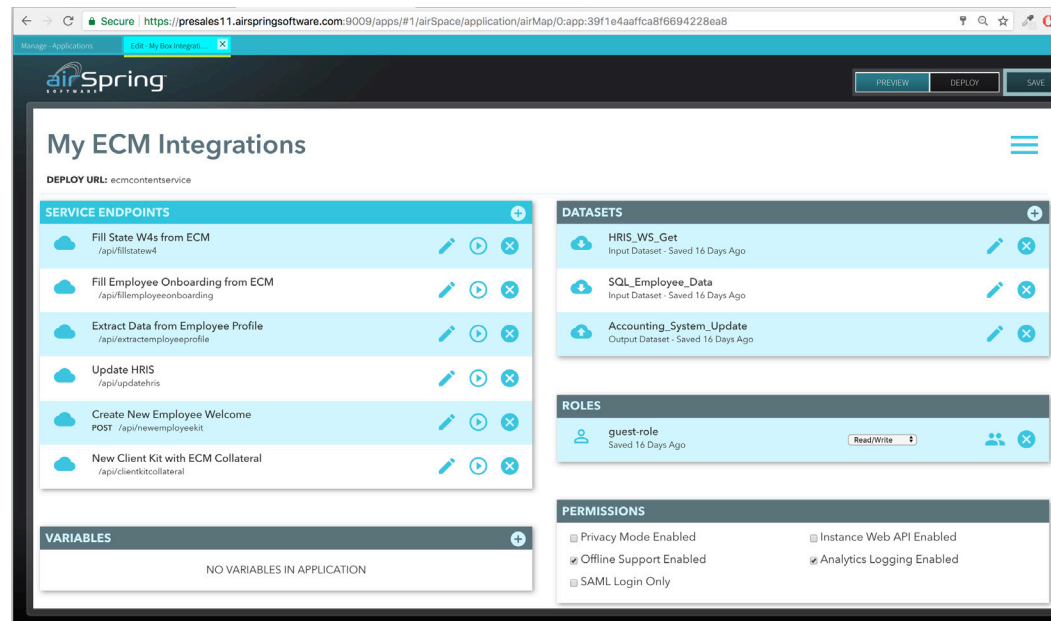

Build: Engage our IT staff to build and deploy your documents, applications, and services.

Online Documentation: Accelerate productivity with easily accessible notes, guides, and tutorials.

IMPROVE THE CUSTOMER EXPERIENCE

Companies today are dealing with an ever-increasing amount of customer content and high expectations for its digital presentation. The airSpring low-code platform makes it easy for developers to build and run applications, APIs, and services to automate customer-facing forms, and personalized documents and workflows.

Need to build a customer-facing application to present, collect, and transfer data? One that generates personalized documents and provides an interactive experience? With airSpring's content management integration and ability to create, prefill, extract data, and automate processes as a service within a larger application, businesses now have an opportunity to more quickly modernize the customer experience.

“We love that airSpring can be easily modified to fit our business systems and practices both today and as we grow and change in the future.”

Jeff Betzoldt, President
MacLellan Services

MAKE DIGITAL TRANSFORMATION REAL

- **Create a personalized PDF** from an HTML design and user-provided data, including conditional content retrieved from a content repository.
- **Prefill PDF forms** with customer data either passed to an endpoint or retrieved from a database by the endpoint.
- **Extract data** from PDF form and send to another service or return to the caller. Eliminate data re-keying.
- **Bundle marketing kits** on the fly based on client data in a CRM system to dynamically select approved content from an ECM solution.
- **Automate workflows** that involve client deliverables dynamically created by airSpring and combined with externally managed content.

CREATE

	Application	EndPoint
Component library to create content and experiences	X	X
Data and logic to create variable documents	X	X
Multi-lingual including multi-byte languages	X	X
Include data from Web Services, SQL, files	X	X
Use existing images, fonts, style sheets, PDF, PPT, data files	X	X
Dynamic content display based on data/user input	X	X
Custom Javascript with built-in airSpring functions	X	X
End user text editing and customization	X	

INTEGRATE

Render PDF from custom HTML designs	X	X
Built-in Actions, chained sequentially and in parallel	X	X
Combine composed documents and PDFs retrieved from ECM	X	X
Send generated PDF to ECM and as email attachment	X	X
Extract field names/types from PDF forms	X	X
Prefill PDF Forms and extract data as JSON	X	X
Export realtime analytics for insights	X	X
Read/write data from Web Services, SQL, files, built-in analytics	X	X

MANAGE

Single click deploy to load-balanced server pools	X	X
Archive/Restore of application versions	X	X
Built-in analytics, tracing, logging	X	X
Design side testing without deploy	X	X
Define API and export to OpenAPI spec		X
Combine endpoints into packaged microservice		X
Authentication via OpenLDAP, Active Directory, SAML 2.0, Google	X	
User defined roles and permissions	X	

PARTNER PROGRAMS

airSpring provides a variety of models for partners to build/run/manage document-oriented applications and microservices to accelerate digital transformation for their clients.

System Integrators: Provide expert development and systems integration to accelerate customer digital transformation initiatives.

Solution Providers: Create and deliver software solutions that are further enhanced with interactive UX, data transformation, and document-oriented microservices.

Consultants: Provide airSpring implementation or UX design services to licensed airSpring customers.
