About flexiOPS

Formed in 2010, flexiOPS is Scotland's most successful provider of innovative infrastructure and software technology solutions within the European Commission funded FP7 and Horizon 2020 research programmes.

Horizon 2020 is the biggest Research and Innovation programme ever with nearly €80 billion of funding available over 7 years (2014 to 2020). It is the financial instrument implementing the Innovation Union, a Europe 2020 flagship initiative aimed at securing Europe's global competitiveness. It promises more breakthroughs, discoveries and world-firsts by taking great ideas from the lab to the market.

With over 20 years collective experience in technology services, the flexiOPS team has at its core a strong track record for forging collaborations between commercial players and expert researchers making it perfectly placed to further capitalise on the Horizon 2020 initiative.

Tern acquired flexiOPS alongside its sister company, Concerto, for a combined total of £75,000 in 2016. Concerto was sold in November 2016.

flexiOPS Solutions

flexiOPS is a team of cloud services experts providing bespoke cloud services consultancy and flexible business solutions. Additionally, flexiOPS offers a complete state of the art IaaS software platform that allows partners to explore monetised cloud business services.

“Although a recent investment for Tern, the Tern team have quickly helped us to refine our proposition, identify quick wins, whilst providing the financial agility and support to develop new sources for our grant bids and software solutions”

Craig Sheridan, Managing Director, flexiOPS
