Dead Simple Audit and Compliance

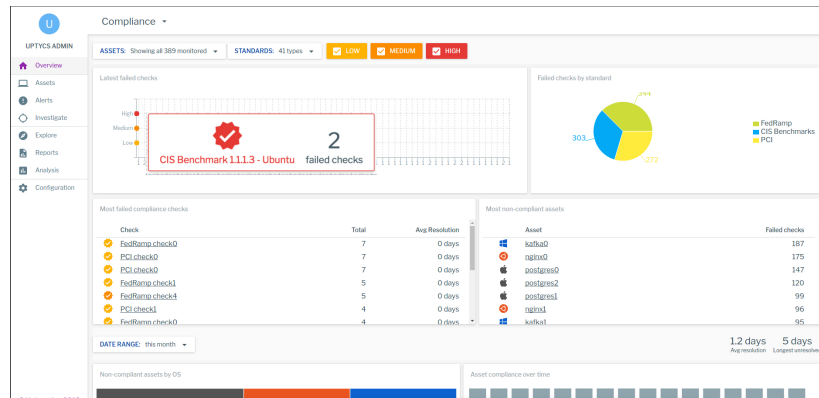

The ephemeral nature of cloud assets and containers requires a new approach to audit and compliance. Uptycs offers the ability for comprehensive cloud compliance with our unique full state recreation for decommissioned assets- tracking assets every second that they are in operation.

Uptycs automates and drastically improves the speed of evidence gathering and reporting to meet compliance standards by offering ready to use:

- **Reports**
- **Dashboards**
- **Alerts**

New! Compliance Dashboard

With Built-In CIS Benchmark checks, this dashboard delivers a comprehensive view of compliance across your cloud assets. Instantly see **and be alerted** of the latest failed configuration checks, most non-compliant assets, non-compliant behavior, and more.

Pre-Configured Audit and Compliance Reports

Take the headaches and manual work out of compliance reporting and audit prep with ready-to-use, out-of-the-box reports that automate and dramatically improve the speed of evidence gathering. Uptycs is a licensed CIS Secure Suite Service provider, offering reporting for:
