The information contained in this document was obtained from third-party sources, may not be all-inclusive and is subject to change without notice. Content is informational only and does not constitute medical, legal or reimbursement advice and represents no statement, promise or guarantee of payment. The provider is solely responsible for determining appropriate treatment for the patient based on the unique medical needs of each patient and the independent judgment of the provider. It is also the responsibility of the provider to determine payer appropriate coding, medical necessity, site of service, documentation requirements and payment levels and to submit appropriate codes, modifiers and charges for services rendered. Although we have made every effort to provide information that is current at the time of its issue, it is recommended that you consult your legal counsel, reimbursement/compliance advisor and/or payer organization(s) for interpretation of payer-specific coding, coverage and payment expectations.

NeoTract, Inc. encourages providers to submit claims for services that are appropriately and accurately consistent with FDA clearance and approved labeling and does not promote the use of its products outside their FDA-cleared labeling.

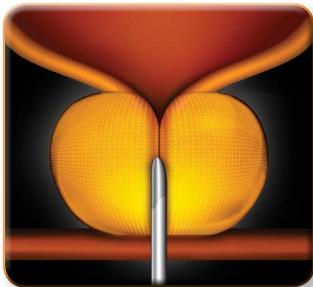

## The UroLift® System and Indications

The UroLift® transprostatic implant system retracts prostate tissue away from the urethra without cutting, heating or removing prostate tissue. This FDA cleared device is indicated for the treatment of symptoms due to urinary outflow obstruction secondary to benign prostatic hyperplasia (BPH), including lateral and median lobe hyperplasia, in men 45 years of age or older.

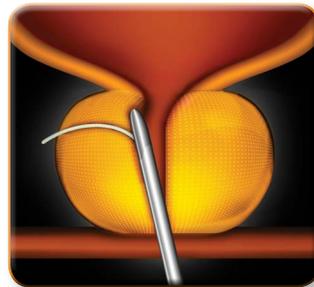

## The UroLift® System Procedure

The UroLift® System is comprised of a cystoscopic delivery device which the physician uses to deploy permanent, individually tailored transprostatic implants to retract the obstructing prostatic lobes. Although it is predicated on the patient's anatomy and prostate size, typically 4-6 implants are required per patient to effectively reduce obstruction of the urethral lumen.

Cystoscopy is conducted to assess the urethral condition, assess the condition of the bladder, and plan the placement of the implants. At the time of the procedure, a cystoscopy sheath is advanced into the bladder, and the telescope bridge is replaced with the UroLift System implant delivery device. Under endoscopic guidance, the physician determines the precise location to compress the obstructing prostatic lobe and deploys the transprostatic implant. Each implant is assembled and tailored *in situ* as it is delivered. After the appropriate number of implants are placed, the physician removes the UroLift System delivery device and sheath, leaving retracted lateral prostatic lobes. The exact number of transprostatic implants required is determined by a trained physician and can vary depending on the size and shape of the prostatic lobes. Typically, the physician conducts a final cystoscopy to assess the result of creating a continuously open channel through the anterior aspect of the prostatic urethra.

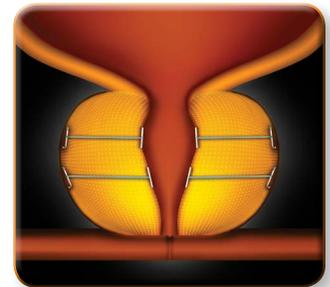

The UroLift® System is conducted cystoscopically through the urethra to access the obstructing lobes of the enlarged prostate.

Permanent implants are delivered transurethally through the prostate tissue to open the urethra lumen.

Based on the unique characteristics of the prostate, every implant is assembled and tailored *in situ* as it is delivered.

The implants hold the prostatic urethra in a less obstructed configuration, thereby mitigating BPH symptoms.

## The UroLift® System Reimbursement Support

Neotract, Inc. has developed this Billing Guide to help support your efforts throughout the reimbursement process for the UroLift® System transprostatic implant system. Additional resources can be found at [www.UroLift.com/physicians/reimbursement](http://www.UroLift.com/physicians/reimbursement) or through the NeoTract Reimbursement Team at 844.516.5966 or by email at [UroLiftreimbursement@teleflex.com](mailto:UroLiftreimbursement@teleflex.com).

## Billing the UroLift® System Procedures

### Diagnosis Coding

It is always the responsibility of the provider to verify codes and code to the highest level of specificity. Because the UroLift System is indicated for lower urinary tract symptoms associated with BPH, the most common diagnosis code is:

**Table 1**

ICD-10 Diagnosis Coding	
Code	Description
N40.1	Enlarged prostate with lower urinary tract symptoms (LUTS)

### Prior Authorization

Many payers require authorization prior to the physician treating the patient. As such, prior authorization is recommended for all non-Medicare prostatic urethral lift procedures including Managed Care Medicare (aka Medicare Advantage). Like many other procedures and tests, some payers have established medical necessity criteria for the UroLift System procedure. Your UroLift System sales representative or the reimbursement support team can provide a summary by payer of the criteria we are aware of. To further assist with the prior authorization process, a sample letter of medical necessity can be found online under the Reimbursement tab of the UroLift System website at [www.UroLift.com/physicians/reimbursement](http://www.UroLift.com/physicians/reimbursement).

Some payers do not require prior authorization for outpatient procedures. If that is what you are told by a payer specific to the UroLift System procedure, please request a voluntary, written authorization from payer prior to proceeding with the case. Retain the authorization in the patient chart for future reference as needed.

### The UroLift® System Procedure Coding

#### Medicare

Procedural HCPCS codes are used to describe the prostatic urethral lift procedure, including implants, in the ambulatory surgery center (ASC) settings. Allowed amounts may vary geographically and are inclusive of the permanent transprostatic implants. One or the other procedural HCPCS codes will be used depending on the number of permanent implants delivered. While HCPCS codes starting with “C” are often considered device codes and not billable by ASCs, in the case of the UroLift System, it is important to note C9739 and C9740, are actually procedure codes established by Medicare. The C code payments to the ASC under Medicare are inclusive of the associated implants.

Both HCPCS codes C9739 and C9740 are included in CMS Addendum AA, ASC Covered Services, as of April 1, 2014. The Medicare ASC fee schedule can be found at [www.cms.hhs.gov](http://www.cms.hhs.gov). Please see Table 3 below for more information on the nationally unadjusted allowed amounts for the ASC site of service.

#### Non-Medicare

Some commercial insurers may recognize the procedural HCPCS codes C9739 and C9740 in the ASC setting. Some insurers, however, may choose to have CPT® codes 52441 and 52442 used to report the prostatic urethral lift procedure in this site of service. Please verify with your non-Medicare payers their preference for reporting of this procedure.

## Billing the UroLift® System Procedures (cont.)

**Table 2**

Facility: Medicare*		ASC	
HCPCS	Description	Nat'l Unadjusted Allowed Amount**	SI †
C9739	Cystourethroscopy, with insertion of transprostatic implant; 1 to 3 implants	\$3,281	J8
C9740	Cystourethroscopy, with insertion of transprostatic implant; 4 or more implants	\$6,908	J8

\*Department of Health and Human Services, Centers for Medicare & Medicaid Services. CMS – 1717 – FC: Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems – Final Rule with Comment Period and CY2020 payment rates.

\*\*Rates referenced in this guide do not reflect sequestration adjustments which are automatic reductions in federal spending that will result in a 2% across-the-board reduction to all Medicare rates as of April 1, 2013. Quoted rates also do not reflect payment adjustments related to quality of and/or meaningful use.

† ASC Status indicators:

J8: Device-intensive procedure; paid at adjusted rate

### Alternative Coding for Some Non-Medicare Plans

Because some non-Medicare payers do not recognize HCPCS codes developed by CMS, it is recommended that you verify with each payer their coding requirements for ASC claims, including verifying your contracted fee schedule amounts for those codes. If CPT codes are required, CPT code 52441 is always billed only once and add-on CPT code 52442 may require multiple units based on the number of additional implants used. Please see Table 3 below for more information on CPT coding. Some non-Medicare payers may require the implants to be billed separately under device code L8699. Non-Medicare payer fee schedules are typically proprietary and will vary by payer and product.

**Table 3**

Facility: Alternative Coding for Some Non-Medicare and Medicare Advantage Plans		ASC
CPT®	Description	Allowed Amount
52441	Cystourethroscopy, with insertion of permanent adjustable transprostatic implant; single implant	Payer Priced
+52442	Each additional permanent adjustable transprostatic implant (List separately in addition to code for primary procedure)	Payer Priced
L8699	Prosthetic implant, not otherwise specified (each implant may be billed with CPT or HCPCS codes depending on your contract)	Payer Priced (if required by the payer)

### Revenue Codes

ASC billing staff should confirm the appropriate revenue codes to use at their facility if billing on a UB-04 claim form. The following revenue codes may be appropriate for reporting components of the UroLift® System procedure:

**Table 4**

0278	Medical/Surgical Supplies and Devices – Other Implants
0360	Operating Room Services – General
0361	Operating Room Services – Minor Surgery
0490	Ambulatory Surgical Care – General
0510	Clinic – General Classification
0519	Clinic – Other Clinic

## Filing Claims & Appeals

### Claims & Appeals Information

Medicare and commercial payers may request additional documentation before or during processing claims. Providing appropriate documentation of medical necessity upon request may help to avoid unnecessary payment delays and denials. A sample letter addressing medical necessity can be found online under the Reimbursement tab of the UroLift System website at [www.UroLift.com/physicians/reimbursement](http://www.UroLift.com/physicians/reimbursement).

In the event of a denied, or what appears to be underpaid claim, various sample appeal letters, letters of support from specialty societies like the American Urological Association, Sexual Medicine Society, SUFU and link to AUA Clinical Guidelines [[www.auanet.org/guidelines/benign-prostatic-hyperplasia-\(bph\)-guideline](http://www.auanet.org/guidelines/benign-prostatic-hyperplasia-(bph)-guideline)] on the Surgical Management of BPH are available online under the Reimbursement tab of the UroLift System website at [www.UroLift.com/physicians/reimbursement](http://www.UroLift.com/physicians/reimbursement).

In addition, please review the checklists below for guidance on filing claims and appealing denied claims. It will be important to consider these tips in preparing and processing UroLift System procedure claims and appeals.

#### Checklist for Claim Submission

- ✓ Review the Payor Coverage Policy Lookup Tool to verify your state's coverage at [www.UroLift.com/physicians/reimbursement](http://www.UroLift.com/physicians/reimbursement) under the physician's tab
- ✓ File the claim within the time line for each payer
- ✓ If appropriate, include prior authorization or precertification verification from payer
- ✓ Select the appropriate CPT or HCPCS code depending on the procedure, location and number of implants
- ✓ Code diagnosis, codes to the highest level of specificity
- ✓ Always maintain thorough documentation supporting the medical necessity of the prostatic urethral lift procedure
- ✓ Consider keeping a copy of the product invoice in the patient's chart in the event it is requested by a payer
- ✓ For reimbursement questions, contact the NeoTract Reimbursement Team at 844.516.5966

#### Checklist for Appealing Denied Claims

- ✓ Verify the most appropriate Dx code was used
- ✓ Use an accurate description of services
- ✓ Include a statement of medical necessity (see a sample letter of medical necessity online at [www.UroLift.com/physicians/reimbursement](http://www.UroLift.com/physicians/reimbursement))
- ✓ Refer to the sample appeal letters online at [www.UroLift.com/physicians/reimbursement](http://www.UroLift.com/physicians/reimbursement) for more information
- ✓ Always reference and include all original claim information and correspondence from the payer
- ✓ Follow the payers appeal process paying special attention to filing timelines
- ✓ Follow up on the appeal in a timely fashion
- ✓ For reimbursement questions, contact the NeoTract Reimbursement Team at 844.516.5966
