### A Good Map Keeps You on Course!

The scary part of switching may be not knowing how to move from your old software to better software. Fortunately, we've helped more than 1,100 practices move from frumpy to fabulous with success. We have a map. And we're happy to share it with you. Call us!

2

### An Experienced Guide is a Must!

Your map comes with a real person to guide your way. We're going to walk you through every step. Our guides have more than 12 years of combined experience in taking practices to the cloud. We call them implementation coordinators. You'll call them angels!

3

### A Better Way to Train Your Team

In the old days a rigid, agenda-driven trainer would descend upon your practice and grace you with wisdom from a fire hose. That's so 1990s! We've refined the art of training. You won't close your practice and retention is super high. You should learn more: Call us.

4

### We Can Convert Your Current Data

Don't let data conversion scare you into sticking with bad software forever. Chances are we've converted data from your existing software many times over. Your practice will most likely present us with something we haven't seen before. We have stories to tell you won't believe!

# 4 Secrets to an **Easy Switch**

Let's be honest: You took a peak at Curve Dental because there's something about your current software you don't like. But the idea of switching to better software may be a bit scary. No worries! Here are four secrets we now that make the switch easier than ever!
