

Optimized remote workplace experience

The challenge

As the world and the global economy get more interconnected and volatile the risk of dramatic changes in workforce behavior and patterns also increases. Things like the global outbreak of the Corona virus have already impacted many organizations, forcing people to work from home, especially if they have been to sensitive areas. Technical solutions, networks nor capacity for many organizations have never been designed to cope with the share volume of new users now connecting “outside in” to the organizations it-ecosystem, and that is now increasing the risk of severe impact on business, operations, production and social services.

Recession

Political upheaval

Cybercrime

Natural disaster

Pandemics

World economics

Supply chain

The solution

Implementing a scalable solution based on Azure cloud services provides the organization with all the digital capabilities needed to reduce traditional firewall and VPN bottlenecks when the amount of remote workers increases.

The solution complements any short-term capacity measures like throttling “non-business critical” traffic, off-loading traffic from VPN concentrators or bypassing ordinary internet connections.

The value

By using Azure cloud services the organization can provide a secure, temporary and virtual workplace where users can continue to be productive and access necessary applications remotely.

The organization can reduce unnecessary CAPEX in hardware, capacity and software when workforce patterns and behavior changes rapidly.

The Azure cloud services has built-in single sign on experience and security and is built as an elastic service and can scale accordingly.

The Windows Virtual Desktop delivers a secure and full-blown Windows 10 workplace in the cloud.

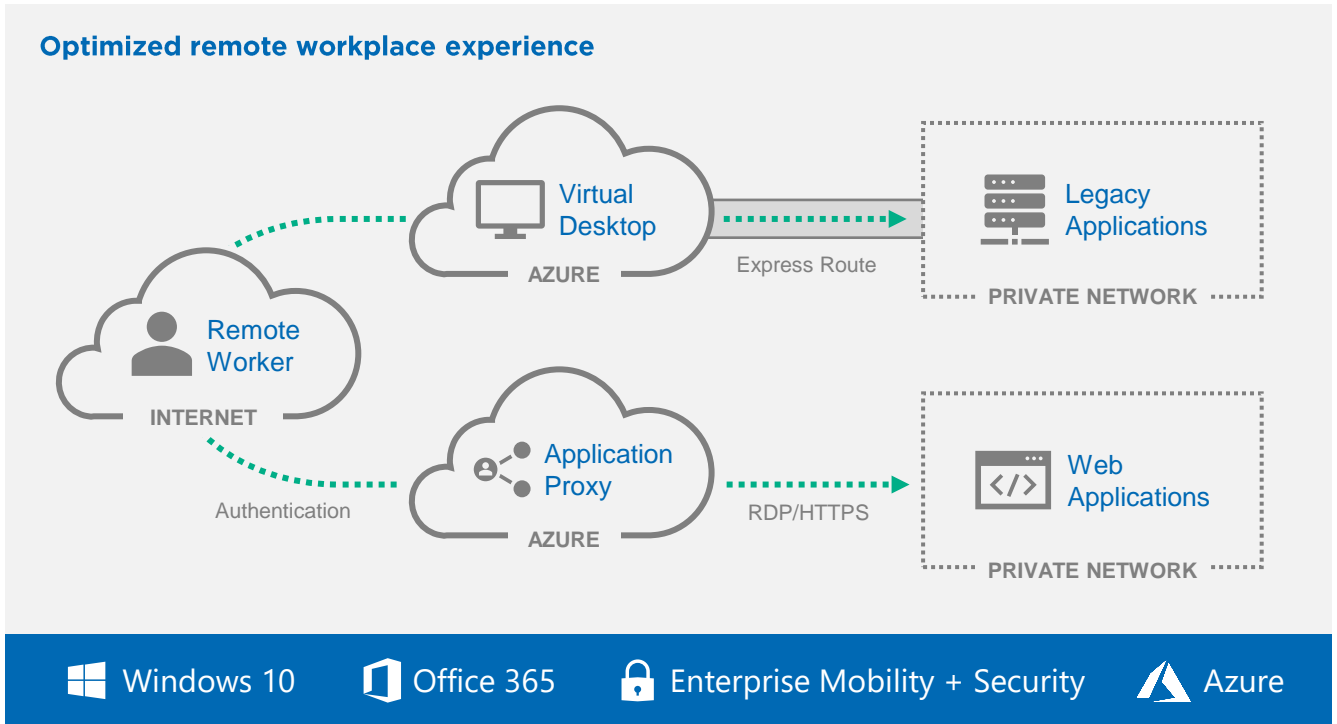

The solution is built on existing Azure cloud services that reduces the time to deploy it and get users productive.

Optimized remote workplace experience

The how

With our long-term experience and deep technical expertise in bringing advanced and connected experiences to our customers we will bring unique insights and perspectives into establishing solutions that could offload traditional bottlenecks and keep the organization productive when workforce behavior and patterns changes.

Why Enfo

Our values are at the core of our actions; collaboration, trust, continuous development and expertise. We walk beside our customers in their data-driven business transformation, taking ownership of their transformation as if it were our own.

**Mastering
complexity**

**Confidence
in cloud**

**Genuine
care**
