Microsoft Security Workshop

The challenge

Organizations like yours are managing a growing volume of data and alerts, all while dealing with tight budgets and vulnerable legacy systems. In this environment, minimizing security risks is a massive challenge.

Given the volume and complexity of identities, data, applications, devices, and infrastructure, it's essential to learn how secure your organization is right now, and how to mitigate and protect against threats moving forward.

The solution

Designed for today's security stakeholders, the workshop will help you develop a strategic plan based on the recommendations of Microsoft cybersecurity experts, customized specifically for your organizational needs. You'll not only gain visibility into immediate threats across email, identity, and data; you'll get valuable clarity and support on how to upgrade your security posture for the long term.

Identify current, ongoing risks to your cloud environment

Walk away with actionable next steps based on your specific needs and objectives

Document your security strategy for the benefit of key stakeholders

Understand how to accelerate your security journey using the latest tools

The value

Help achieve your broader security objectives and identify current and real threats. Get actionable next steps based on your specific needs and objectives and a better understand of how to accelerate your security journey using the latest tools.

- Showcase security scenarios with hands-on activities

- Develop joint plans and next steps

- Identify real threats to your cloud environment by doing Threat Check

- Work with you to understand your security goals and objectives

- Deliver the end-to-end Microsoft security story

Microsoft Security Workshop

The how

During this one-day workshop at your site or virtually, we'll partner with you to strengthen your organization's approach to cybersecurity. It starts by helping you better understand how to prioritize and mitigate potential attacks.

How it works: we recommend to start two to three weeks prior to the workshop with our experts activating the Threat Check solution to run on top of your existing cloud infrastructure. On the day of the workshop, we'll walk you through a comprehensive Threat Check Results report featuring deep analysis of real cyberattack threats we've found currently targeting your organization in three critical areas: identity, email, and data.

In addition to the Threat Check report, you'll get:

- A list of actionable recommendations to help immediately mitigate the identified threats
- A detailed assessment of your IT and security priorities and initiatives, direct from cybersecurity professionals.
- An inside look at Microsoft's holistic approach to security, and how it relates to your organization

- A hands-on opportunity to experience what integrated security looks like, including the latest tools and methods
- Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps

Who should attend?

The workshop is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Data Protection Officer
- Data Governance Officer

- IT Security
- IT Compliance
- Data Governance
- IT Operations

Why Enfo

Our values are at the core of our actions; collaboration, trust, continuous development and expertise. We walk beside our customers in their data-driven business transformation, taking ownership of their transformation as if it were our own.
Mastering
complexity

Confidence in
cloud

Genuine
care
