

# Office 365 Security & Compliance

## The challenge

Across industries, challenges in security management include ever increasing complexity of attack methods that ultimately leads to deployment of more solutions. You must manage distributed resources across many environments. Given the constantly evolving threats, this means more attacks surfaces that need to be protected.

In some cases, you may end up having multiple point solutions even within a single workload to address specific security concerns. However, managing a growing number of individual security controls becomes a true nightmare. You lose full visibility into the security state of that workload, let alone the entire organizational security.

## The solution

We will help you leverage the most effective controls that enable us to balance productivity and security through your Office 365 subscription capabilities. Based on our best practices we can provide a set of recommendations on what security controls you should enable to better protect your tenant from threats like data exfiltration, account breach, and elevation of privilege.

## The value

Whether your assets are deployed in the cloud, on-premises or across a hybrid environment, we will work with you to manage and secure your organization's four core security components.

# Office 365 Security & Compliance

## The how

Implementing the security technologies available in Microsoft Office 365 has been key to helping our security team adopt a proactive threat-response strategy while simultaneously supporting the productivity needs of our customers.

We're able to better protect the vast number of devices that need access to corporate resources while bringing together our device monitoring and management systems under one single dashboard.

## RISK MANAGEMENT

### Security Management

- Azure Active Directory
- Microsoft 365 Security and Compliance Center
- Microsoft Secure Score
- Microsoft 365 Security Administration
- Microsoft Graph Security API

### Identity-based protection

- Azure Active Directory
- Windows Defender Credential Guard
- Microsoft Identity Manager
- Active Directory Certificate Services
- Active Directory Federation Services
- Microsoft Intune
- Microsoft Authenticator
- Windows Hello
- Active Directory
- System Center Configuration Manager

### Information protection

- Office 365 Advanced Data Governance
- Azure Information Protection
- Office 365 Data Loss Protection
- Windows Information Protection
- Microsoft Cloud App Security

### Threat protection

- Microsoft Cloud App Security
- Office 365 Threat Intelligence
- Office 365 Advanced Threat Protection
- Windows Defender Advanced Threat Protection
- Microsoft Graph Security API

 Windows 10

 Office 365

 Enterprise Mobility + Security

 Azure

## Why Enfo

Our values are at the core of our actions; collaboration, trust, continuous development and expertise. We walk beside our customers in their data-driven business transformation, taking ownership of their transformation as if it were our own.

Mastering  
complexity

Confidence in  
cloud

Genuine  
care
