Cloud enabled personal storage

The challenge and opportunity

Most organizations have a long history of storing and managing user data on local file shares in their datacenters, but with rapidly growing volumes and security concerns this a situation that's going to be hard to manage efficient in the long run.

Technology is changing the way we do business so does the requirements in providing a workplace where people can collaborate and share information in a secure and robust way.
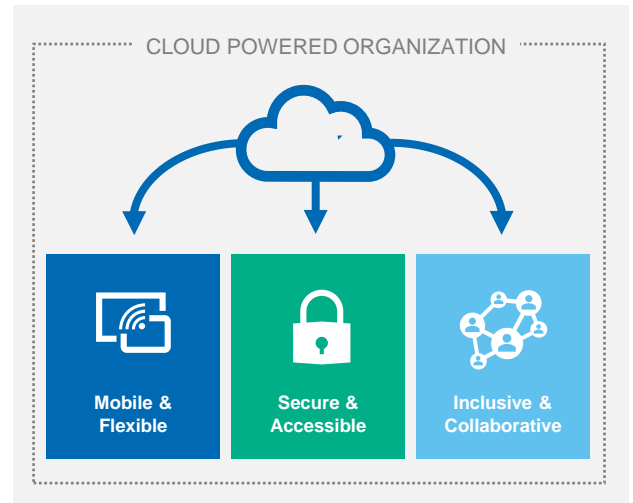

Keeping up with this progress and still providing users a modern and mobile workplace requires that organizations move away from traditional local "on premise" solutions and adopt the cloud.

CLOUD POWERED ORGANIZATION

Mobile & Flexible

Secure & Accessible

Inclusive & Collaborative

The solution

Moving personal storage areas to the cloud will enable the organization to work with documents mobile and flexible both online and offline.

Cloud storage solutions also removes the burden for the organization in keeping up with capacity planning, hardware investments and backups by providing limitless and secure storage.

The cloud have built in advanced compliance and security capabilities that enables the organization to control and safeguard their valuable information.
The value

Personal storage areas in the cloud will enable new possibilities for mobile work since information can be accessed anywhere and from any device.

Documents can securely and easily be shared with colleagues inside the organization as well as with external customers and partners

Cloud powered personal storage provides enterprise grade security and modern information protection capabilities to protect the organization's sensitive data and makes sure that only users who are entitled to access data can do so.

This is made possible by advanced encryption, compliance, and security features that keep your company data protected.

Enable Adaptive Workstyles

Get Smarter by Insight

Increase Communication

Drive Effective Collaboration

Accelerate Transformation

Cloud enabled personal storage

The how

With long-term experience and deep technical expertise we can provide cloud migrations no matter the size, difficulty and complexity of the organization and it-ecosystem.

Our prescriptive advice, proven processes and methods ensures that the migration to cloud based storage is done in a secure and efficient way. This is secured by the creation and implementation of modern information protection strategies together with the organization

We know that moving to the cloud is a cultural change for the organization and that success can only be reached when the users understands the new way of working and what benefits that introduces. To reach true user-adoption we work with effective and proven communication and training plans to keep all users informed, engaged and ready for a modern way of working.

Assess & Plan	Prepare & Communicate	Implement & Integrate
Plan migration strategy, assess needs for information protection and user education	Set up security features and prepare organization for new way of working	Proceed migration and integrate new way of working
