

# IT Mergers & Acquisitions Centre of Excellence

## The challenge

As the global business landscape rapidly becomes more volatile and top-fueled with new potentials enabled by digital capabilities, its more important than ever for any business to have a robust strategy on how to handle mergers, acquisitions and divestitures between organizations, countries and cultures.

And as IT is deeply embedded in today's business processes and deliveries, there is a greater need for a structured Due Diligence focused on it-ecosystems that expose all risks and synergies involved in the transition to minimize business disruption and enabling all involved organizations to continue operate from day one.

## The solution

It all comes down to proven processes and plans built on an IT M&A strategy that keeps the users in focus and fully aligns with corporate plans, strategies and future ambitions of all involved parties and stakeholders.

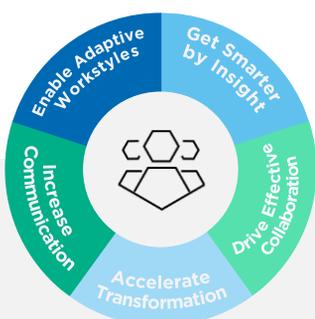

The IT M&A strategy should clearly define how the organization will approach the activity, to what level the it-ecosystem will be integrated, how investment will be handled, how organizations will interact with each other and the high-level plan for each of the technology domains.

## The value

Organizations can keep the impact on individuals to a minimum to ensure motivation, productivity and engagement during transition, at the same time as the technical merge or carve out in the it-ecosystem is performed in an agile and robust way.

The purchasing organization or private equity will have full visibility into all risks and costs associated with the transition and complement the overall planning and execution not just from a financial, legal, intellectual property and brand perspective but as important from a digital.

Secure a framework for business contingency, market presence and minimize end customer impact during the critical organizational transition and transformation of the it-ecosystem.

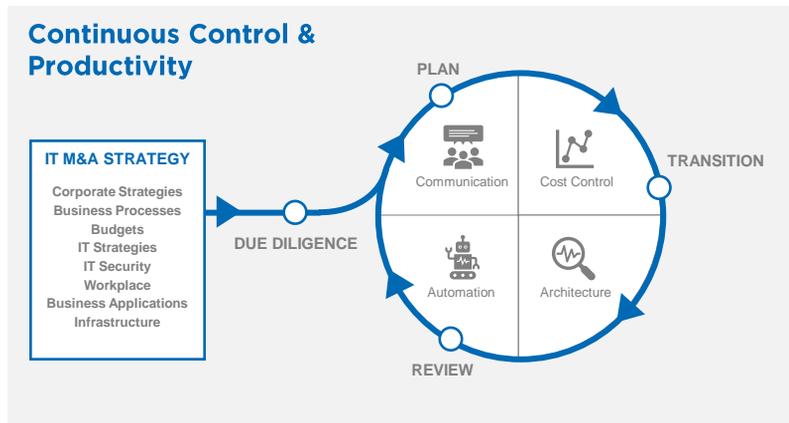

# IT Mergers & Acquisitions Centre of Excellence

## The how

Our award-winning IT M&A services provides all stakeholders like the purchasing and/or private equity organization full visibility into all risks and costs associated with the IT transition.

The IT Due Diligence phase is governed by our structured and proven process based on a risk and value-based approach, ensuring that both the technology landscape and the IT operating model are included in the study and analysis.

We structure the technical integration program to support business priorities and take advantage of automation to ensure speed and consistency in delivery.

- Award winning (RITA®) co-created IT M&A services
- More than 25 due diligence exercises completed
- 16 M&A consolidations completed successfully
- +10,000 users and devices migrated
- +2,500 application servers migrated
- Automation is core to our delivery
- We take ownership of the process
- Consultants with cross-platform expertise
- Experts within cloud and traditional services
- Capacity service scales to meet project demands

## Why Enfo

Our values are at the core of our actions; collaboration, trust, continuous development and expertise.

We walk beside our customers in their data-driven business transformation, taking ownership of their transformation as if it were our own.

**Mastering  
complexity**

**Confidence  
in cloud**

**Genuine  
care**
