

Intelligent intranet powered by Microsoft 365

The challenge and opportunity

The struggle in trying to engage and connect large organizations via traditional intranet solutions is a well-known and common challenge for many.

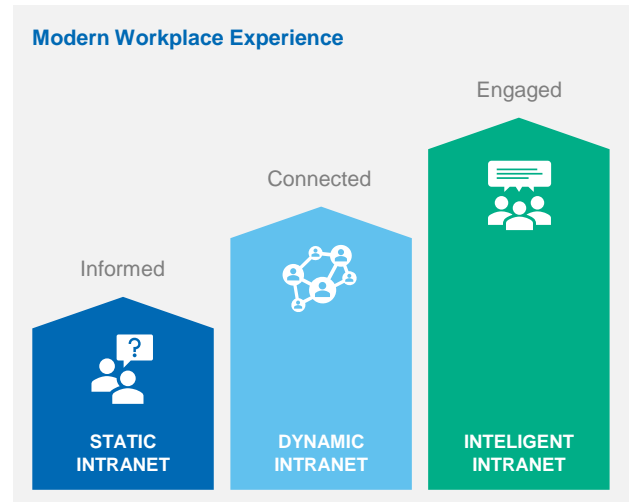

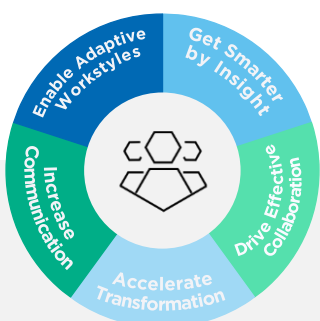

Traditional intranet solutions tend to be designed and operated as “Static Intranets” where important information is easily found but often stale, and with communication mainly flowing one-directional.

The other ones are the “Dynamic Intranets” where information can flow bi-directional but without any intelligence or data driven insight into the solution that enables people to engage with each other and innovate to its fullest potential.

The solution

The next wave of intranet solutions are the cloud powered and modern “Intelligent Intranets” that are no longer operated as silos but is an integrated and vital part of the modern workplace experience.

The “Intelligent Intranets” are built on the concept of providing the organization prescriptive insight into large sets of data, helping them protect and secure their information and assets, at the same time as it enables the power of an AI infused solution to the organization and all their users.

The value

An “Intelligent Intranet” built on the combined power in the Microsoft 365 platform enables organizations and all their users to find, share and consume both information and knowledge from any device in any location to drive engagement, innovation and increasing value adding communication.

The “Intelligent Intranet” will bring new connected experiences for users with personalized feeds, ease of access to documents, targeted news and powerful search using Microsoft Search.

Combined with the power of the Azure platform the “Intelligent Intranet” also unlocks an agile and secure application hub for new and innovative ways to turn data and information into insights and business value for the organization.

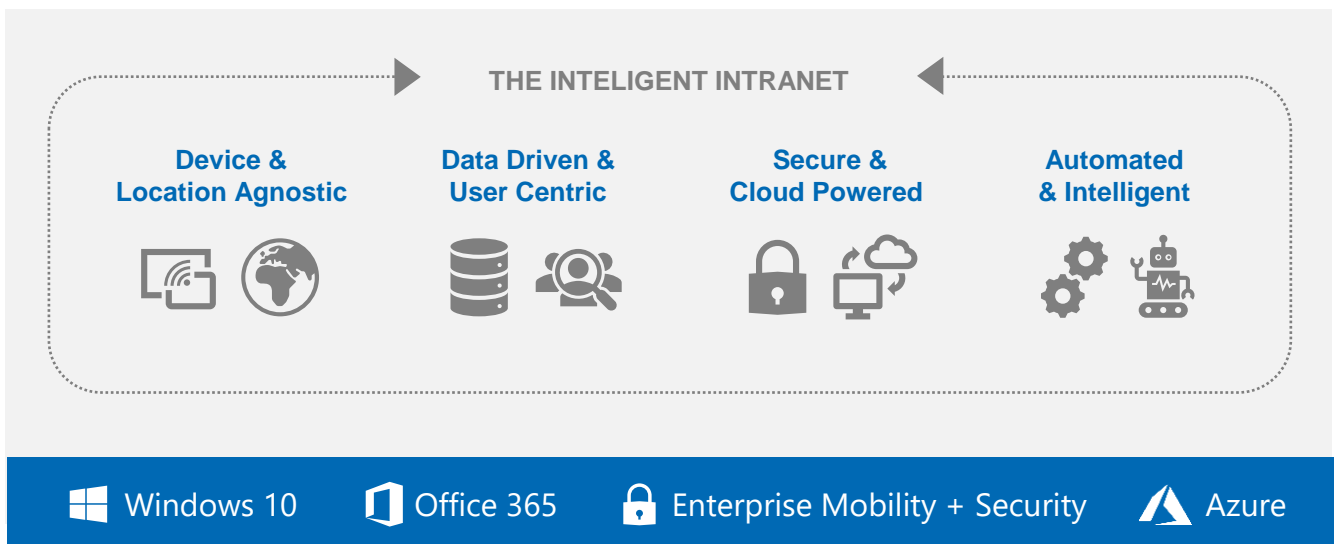

Intelligent intranet powered by Microsoft 365

The how

With our long-term experience and deep technical expertise in bringing innovative and modern workplace experiences to our customers we will bring unique insights and perspectives into establishing the “Intelligent Intranet” built on Microsoft 365 and the Azure platform.

By using a structured approach we will guide and lead the customer through ideation and envisioning of what business value an “Intelligent Intranet” would bring to the organization, into the planning phase and onwards to prototyping, building and deploying the solution. All done with the goal to onboard and educate the organization in a new way of working to maximize the benefits of a cloud powered “Intelligent Intranet”.

Why Enfo

Our values are at the core of our actions; collaboration, trust, continuous development and expertise.

We walk beside our customers in their data-driven business transformation, taking ownership of their transformation as if it were our own.

**Mastering
complexity**

**Confidence
in cloud**

**Genuine
care**
