Intelligent workplace insights

The challenge

Organizations consume and store huge amount of data every day and workplace data is a key asset in that data estate which many organizations wouldn't be able to operate efficiently without.

However, without a well-defined strategy of how to make use of the data, there is a risk that this process of interpretation becomes ineffective, time-consuming and not turned into insights and value.
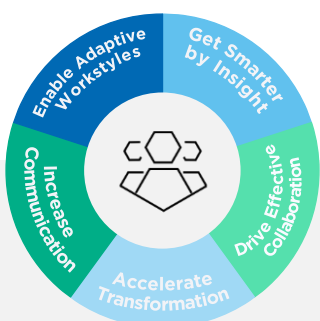

The power of data doesn't lie in the amount, it lies in how it's used and its quality. By visualizing the data in an efficient manner organizations will be able to get the right insight of the data that enables more informed, intelligent and strategic decisions.

The solution

A well-structured common framework establishes the "corporate memory" that prevents personal data silos. By enabling self-service data capabilities and data accuracy a bridge between the business and IT will be created.

Moving from ad-hoc decisions to proactive insights requires a robust transformation plan covering an operative, tactic and strategic way of working.

It's all about providing intelligent insights in an agile but controlled way anytime, from any device and anywhere embracing a modern way of working.

Data Insight Maturity

Reactive & After the fact — **AWARE**

Planned & Predictive — **INFORMED**

Agile & Disruptive — **DRIVEN**

The value

Organizations will gain better insight into their business data that will bring competitive advantage on the market, potential cost reductions and create awareness of compliancy on all workplace levels.

Merging different data sources in to one transparent version of the truth, in a human friendly format, engages the employees to call for prioritized actions based on automated and intelligent insights.

Leveraging data from Office 365, Azure, Windows, and other data sources will unveil collaboration patterns that impact productivity, workforce effectiveness, and employee engagement.

This really embraces and empowers a data driven and co-creative culture that serves as a foundation for efficient workplace automation.

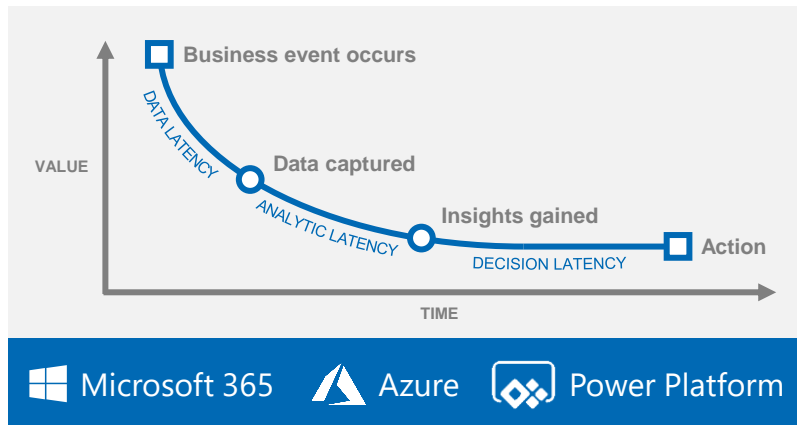

enfo

Intelligent workplace insights

The how

Operating in the workplace area since the beginning of this century has given us extensive domain expertise to lead customers on the journey to a Modern Workplace using insights based on the customers unique data estate.

Through a series of structured workshops we help define the short-term goals as well as building a long-term strategy and roadmap in a co-creative manner.

The outcome from the workshops sets the foundation for the transformation and lifecycle management plan to turn the organization into a data driven and modern workplace.

- **Embraces and empower a co-creative and data driven digital culture**
- **Common data framework creates a bridge between the business and IT**
- **One version of truth in a human friendly format**
- **Self-service insights drives business innovation**
- **Automated intelligent insights enables proactive and agile decision-making**
- **Reduce time consuming manual data discovery to prevent personal data silos**
- **Leverage the power of the cloud to unlock valuable organizational insights from Microsoft 365 and Azure**

Why Enfo

Our values are at the core of our actions; collaboration, trust, continuous development and expertise.

We walk beside our customers in their data-driven business transformation, taking ownership of their transformation as if it were our own.

Mastering complexity

Confidence in cloud

Genuine care
