

FM Audit: The proactive solution to manage your printer network

Printer downtime can be costly to your business, but with an FM Audit, you'll be a step ahead of any issues.

FM Audit automatically tracks toner levels and notifies you when a device is getting low, empowering you to change your operations from reactive to proactive, avoiding downtime and enacting a forward-thinking approach to your tech ecosystem.

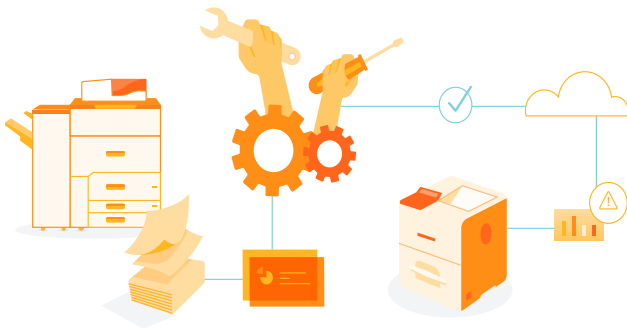

Did you know?

90% of companies don't track printing costs

The average IT department spends **15%** of its time on printing issues

What can FM Audit do for you?
