

# Run a Proactive Business With Tech+ Remote Monitoring

**Avoid unnecessary expenses with constant proactive support, planning, and organization.**

Our RMM always has your back by automating service issues and IT tasks—eliminating potential threats before you even know about them.

Within the last three years, unplanned downtime has cost businesses more than \$2 million. Prevent unnecessary downtime and expenses by utilizing a custom automated software and building a proactive IT plan.

**Our RMM enables you to predict behaviors and budgets across your network. Tech+ Remote Monitoring helps:**

- ✓ Monitor networks to predict and resolve issues
- ✓ Remotely support clients on each workstation and server
- ✓ Prevent costly repairs by solving problems remotely
- ✓ Create understandable roadmaps for securing data efficiently

**Take control of your workflows through digital automation.**

By constantly monitoring the status of your networks and data, Tech+ acts proactively to prevent unnecessary expenses and resources from being wasted - supporting your team, network, and budget.
