

The Analytics Power of DATA INTEGRITY AUDIT

POINTRIGHT SOLUTIONS CENTER

► Your Challenges:

- You need to ensure **accurate Medicare/Medicaid reimbursement** that goes beyond what your EHR delivers.
- You're concerned about the accuracy of **Quality Measure triggers** and **Five-Star Quality ratings**.
- You want to ensure your **compliance plan addresses CMS requirements** for supporting documentation for MDS coding.
- You want confidence in knowing that **each resident's plan of care is based on accurate clinical assessments**.
- You want to **identify areas where MDS coding accuracy** needs improvement.

► PointRight Solution

Data Integrity Audit (DIA) is a Web-based solution that goes far beyond basic checks performed by most MDS software systems. The DIA service audits each MDS for accuracy before submission to CMS and provides clinical, regulatory, financial and risk management imperatives at the point of care. DIA views each assessment the same way a surveyor, fiscal intermediary, or RAC auditor would, and provides immediate feedback for resolution.

RESULTS

- Achieve accurate RUG/case mix reimbursement.
- Improve accuracy of Quality Measures, achieve better interdisciplinary care planning process and gain invaluable data resources for your QAPI initiatives.
- Avoid fines/deficiencies and save significant amounts of time and money from fewer internal audits.
- Comply with regulations, policies and procedures, and avoid RAC Audits.

"PointRight's DIA service is an easy, user-friendly solution. The response is very quick (within a few seconds) after submitting the MDS. We've gotten positive feedback regarding improvement in accurate MDS coding, accurate documentation, QM reporting and identifying residents with high-risk decline, which all enables us to provide better care and also achieve a great State Survey result.

Analytics to Answers
PointRight[®]

As a value-added offering to DIA, our clinical and analytics experts will consult with you to help support your financial and clinical strategies.

► Ease of Use and Accuracy

- Using nearly 400 tests of clinical and logical consistency, DIA helps verify the MDS assessment as a whole, identifying potential inconsistencies within and between sections.
- DIA provides feedback in real-time – *as you complete each MDS* – to assist in timely identification of coding issues or care planning concerns.
 - DIA with Audit Assist also includes explanations that can be checked off to verify supporting documentation.
- Monthly DIA Summary reports guide your management team to areas needing improvement.
 - Performance trended over time and broken down by MDS section.
 - Drill-down to identify specific recurrent issues.
 - DIA with Audit Assist tracks responses to the feedback prompts.
- No additional software is required. PointRight interfaces with MDS software systems to make submission quick and easy.

► Reporting

- **Online Reports Provide Instant Feedback**
 - Identifies inconsistencies and provides “Alerts” for QM triggers and coding questions.
 - Offers possible explanations and shows source for proper coding, providing prompts for documentation.
 - Highlights best-practice recommendations and summarizes facility submissions.
- **Monthly Performance Report**
 - Shows improvement from first to final submission; and illustrates performance by MDS section, helping you identify recurrent issues for quality improvement.
 - Provides resident-level drill-down to both clinical and reimbursement-related, data integrity issues, highlighting unresolved issues.

► Training and Clinical Expertise

- Free initial training, as well as on-demand training videos for new staff and for re-training.
- Immediate online access to PointRight senior-level clinical team via *Ask a Question* links.
- Call or email your Account Management team, as needed.
