

The Market-Tested, Market-Validated

PointRight® Five-Star

FastTrack™

► Your Challenges:

- **Get an easier way** to determine how your facility is currently performing in each of the three domains:
 - Survey, Quality Measures and Staffing** (both RN and all staff):
 - o If surveyors walked through your door today, how would your facility look in Five-Star?
 - o What quality area should be targeted and how many points do you need to reach the next Quality Measure (QM) star assignment?
 - o What changes would need to be made in staffing hours per resident day to increase your future staffing star?
- **Aim for improvement** in your Five-Star rating by understanding if your facility is a potential Special Focus Facility (SFF) candidate?
- **Gain better control** over impacting Skilled Nursing Facility (SNF) ratings in the Centers for Medicare and Medicaid (CMS) Five-Star rating system so consumers can fairly evaluate the quality of care delivered.

► PointRight Solution

The PointRight® Five-Star FastTrack™ solution calculates your Five-Star rating the same way CMS calculates their ratings. The *best* way you can accurately determine how your facility is performing quarterly in each of the CMS Five-Star Rating domains (Survey, Quality Measures and Staffing) is with the power of predictive analytics from PointRight.

RESULTS

- Know your Five-Star Rating today.
- Aim for the Five-Star Rating you want by using “What If” capabilities to see how your facility would present in the future if you made changes to any of the three rating domains.
- Easily see the steps you need to take to “fast-track” your way toward achieving Five-Star goals.
- Navigate your way toward achieving Five-Star Status with PointRight Five-Star FastTrack as your analytics-driven guide.

► RETURN ON INVESTMENT

+8%

On average, PointRight users perform **8% higher in Overall Five-Star ratings** than non-user

+5%

PointRight®

As a value-added offering to the PointRight Five-Star FastTrack solution, our clinical and analytics experts will consult with you to help support your business and clinical needs.

► Fast Track Your Facility to Five-Star

PointRight Five-Star FastTrack offers all of the following solutions in one, easy-to-use service:

- **Easily view your current Five-Star Ratings.** The most current ratings will appear as well as the SFF candidate designation.
- **Find the latest publicly available survey information.** You can also see your points for each survey cycle and the overall score for your facility. Use "What If" functionality to see how certain criteria or citations would impact your Survey and Overall ratings.
- **Use an Expected Staffing Calculator** by entering the number of residents that fall into each RUG category to calculate the staffing levels that would be anticipated based on the acuity of the residents in your facility.
- **See your current staffing as reported on your last survey.** You can compare your staffing levels to national cut points to see how close you are to the next Staffing star rating. Use "What If" functionality to see how other staffing criteria would impact your Staffing Star.
- **See how your current Quality Measures are impacting your Quality rating.** Compare your rating to the national cut points to see how many points you need to get to the next-higher star rating. Use "What If" functionality to see how making changes to the Quality Measure percentages would change your rating. If you have been working on a QAPI project, enter your estimated impact and see how your hard work will pay off!

Five-Star FastTrack enables proactive Five-Star performance management, helping users quickly attain and maintain optimal Five-Star ratings.
