Intland Software Joins prostep ivip

Intland Software, developer of codeBeamer ALM today announced their partnership with the international prostep ivip community to further the development of collaborative engineering processes. As the tool provider of all major German automotive OEMs, Intland joins a distinguished group of participants from industry, IT, and research working to develop standards for requirements management and product data management.

STUTTGART, GERMANY, 6 JUN 2018

Founded in 1993, the prostep ivip association is a global independent network of IT experts focusing on product data management and integrated virtual product creation (iViP). With founding members including Bosch, Continental, Daimler, Delphi, Opel, Siemens, and Volkswagen, prostep ivip brings together esteemed multinational companies working towards more efficient processes, methods and systems in product engineering.

With the adoption of codeBeamer ALM by both startups and major global OEMs, Intland's Application Lifecycle Management platform is on the way to becoming a standard tool to support product engineering in various industries. The innovative software provider welcomes the opportunity to contribute to the work of this global network aiming to solve problems around product data management and virtual product creation. **Intland Software's CEO Janos Koppany** said:

> As software partners of major German automotive OEMs and global companies in multiple sectors, we recognize product developers' need to better understand customer requirements and quickly recognize market trends in a digital era. Intland is happy to be able to participate in the work of prostep ivip. We hope that the expertise we bring to the table will help deliver solutions that allow members of the association to better fulfill customer requirements in their product development efforts, and further their ability to compete in the global marketplace.

About the prostep ivip Association

prostep ivip is a leading global independent network of participants from industry, IT, and research. This industry association is focused on the digital transformation in product development and production. As a driving force behind the digital transformation in the manufacturing industry, prostep ivip focuses and coordinates the requirements of manufacturers and suppliers. The goal is to define standards and interfaces, especially for the digitization of the entire product creation process – from idea to implementation.
