Censipam Customer Success Story

codebeamer™

CENSIPAM uses Codebeamer to manage the collaboration of its distributed teams

> **We are grateful that Codebeamer is helping us achieve our Amazon conservation and sustainable development mission.**

Ranerio Vieira CENSIPAM, Brazil

We are a GIS (Geographical Information Systems) provider for many governmental and nongovernmental institutions involved in the conservation of the Brazilian Amazon Rainforest. According to federal government policy, we try to use open-source software whenever it is possible.

We evaluated many of the open source CASE tools available on the market based on our requirements, which included a development team distributed over several thousand kilometers in 4 states in Western, Central and Eastern Amazon as well as in Brazil.

We determined having a collaborative portal would be highly desirable. Therefore, we analyzed Trac, Bugzilla, JIRA, Mantis, xPlanner, Codebeamer and dotProject as change request, tracking and defect management tools. We'd already used Subversion as our version control system, so integration with SVN was required. Due to the superior quality, integration, ease of use and overall management, JIRA and Codebeamer were selected as the most suitable solutions that met our needs.

We received excellent support from Codebeamer as we developed software using mostly open source software. Our project is progressing very smoothly, and we are grateful that Codebeamer is helping us achieve our goals in our Amazon conservation and sustainable development mission.

Wondering how you could benefit from using Codebeamer?

Find out why organizations like CENSPIAM, USDA, Volkswagen, and Medtronic have selected our tools! See how PTC®'s Codebeamer technology could help you increase development efficiency and reduce costs.
