ABOUT US

ES Power is Singapore's first electricity retailer providing 100% Carbon Neutral electricity to customers, allowing for greater control over their energy consumption with enhanced savings, and the ability to reduce their carbon footprint, at no additional cost.

We recognize the need to evolve the energy landscape in Singapore as we drive the carbon economy to intensify the reduction of greenhouse gas emissions. Our Sustainability Strategy is aligned with the multidisciplinary integrative spirit of the United Nations Sustainable Development Goals, applied contextually to Singapore.

Sustainability shapes the entire conduct and business strategy of ES Power, expressed succinctly with carbon neutral electricity we retail, our social mission of giving back through electricity and innovative digital value-added products and services.

SUSTAINABLE ENERGY SOLUTIONS

Carbon Neutral Electricity

The carbon emissions related to your energy consumption are fully offset and you have an option to complement your plan with environmental attributes from renewable sources. Your business will be awarded with a Carbon Offset Certificate, providing a tangible and quantifiable proof to substantiate your CSR approach or sustainability development goals.

Green Electricity eSolar

You have a premium option to complement Carbon Neutral Electricity with environmental attributes from renewable sources. This provides you with a unique blend of Carbon Neutral and Green Electricity. These environmental attributes are quantifiable and verified through SP Power Grid meters, via a multitude of renewable sources all located within Singapore.

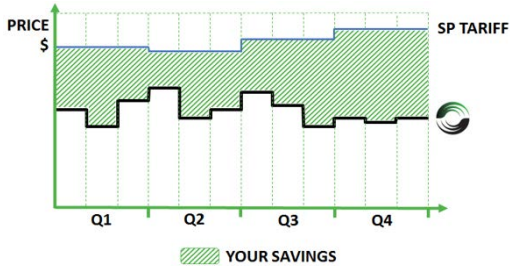

Energy Management

You will receive a personalised Master Dashboard with views and reports to conveniently manage electricity usage within your business. This provides information and transparency needed to make informed decisions, giving you full control over the electricity consumption of your business – Presenting hourly to daily usage as well as monthly comparison charts stating your total amount of carbon offsets.

WE HELP YOU SAVE WITH THE RIGHT PLANS

Wholesale Plan

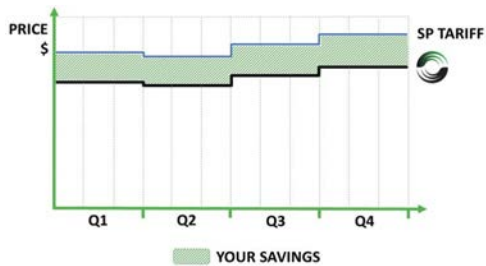

- Highest Possible Savings for Large Enterprises
- Derived from 1/2 hourly Wholesale Prices
- Takes advantage of cheaper Non-Peak Hour Rates
- Complements price caps and other hedges

Signature Plan

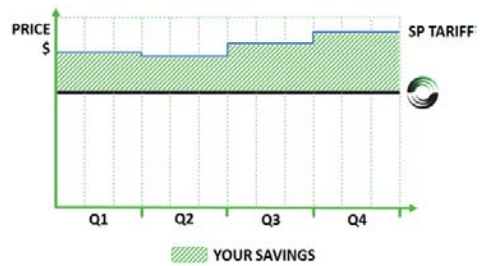

- Highest Possible Savings for SMEs
- Derived from 1/2 hourly Wholesale Prices
- Takes advantage of cheaper Non-Peak Hour Rates
- Complements price caps and other hedges

Discount Off Tariff

- Fixed % discount of SP tariff for Savings
- Derived from quarterly adjusted Singapore Power Tariff
- No rates difference during Peak & Non Peak Hours

Fixed Plan

- Fixed Tariff for a fixed tenure
- Derived at start of tenure by hedging mechanisms
- No rates difference during Peak & Non Peak Hours

WE HELP YOU MANAGE YOUR RISKS

While maximising savings is in everyone's interest, Risk Mitigation allows strategic application of measured resources to protect against unforeseen circumstances. All strategies are tailored to a customer's usage patterns and profiles to minimise costs and maximise savings.

HEDGING

Electricity futures (EF) are used to hedge against potential price volatility.

PRICE CAPS

Customers are also able to buy price caps on floating plans on a calendar month basis instead of the entire contract period.

Tenant Management

Manage with ease the electricity accounts of your tenants in and out of your leased units through our Online Tenant Management System

- Full suite management features (on-board/terminate etc.)
- Master Dashboard with customisable views and reports
- Total management of Tenants' Electricity Bills and Payments
- Gain Full Insight to Tenants Usage with query filters

Enterprise with Multiple Sites

Analyse electricity usage of all your business premises to further monitor electricity consumption from various sites through our Online Enterprise Management System

- Master dashboard with full suite of management features (query filters, reports etc.)
- Wield absolute control of all your electricity accounts as one virtual single account
- Establish parent-child relationship with any of your business sites

WE LIVE GIVING BACK

JOIN US IN OUR SOCIAL MISSION TO
LIGHT UP LIVES OF THOSE IN NEED

ES Power pursues a mission of lighting the lives of the less privileged. We are always willing to support those who take action to do good for the community. The micro-philanthropy platform is designed for social organizations to enjoy carbon neutral electricity at almost cost. We then actively foster a community of benefactors who will partially or fully fund the electricity bills of organizations with a strong social mission.

MAKE A CONTRIBUTION

<https://microphil.espower.com.sg/>

BE A BENEFICIARY

Being a beneficiary means having your ES Power electricity bill subsidised by benefactors who choose to support your social organisation, with the possibility of very low or even Zero Dollar bills.

BE A BENEFACTOR

Contributing any amount for any duration of time will benefit your selected organisation by helping offset their ES Power electricity bill. When you contribute, your act of kindness encourages other like-minded people to do the same.

PARTNER WITH US

ES Power is in a position of empowerment for change as we commit to take you and your business on a comprehensive experience to receive more than just monthly savings with our competitive value plans.

You will benefit from our range of value-added services to manage your electricity consumption while embracing a sustainability initiative to build resiliency and future-proof your business.
