# GeoTeric 2016.2.1 – Out Now

Improving efficiency and making your workflow easier

New! Link to PaleoScan - streamline integration with GeoTeric

- Create PaleoScan project based on Noise Cancelled data in GeoTeric
- Transfer horizons (both ways)
- Transfer volumes (both ways)
- Transfer PaleoScan geological model(s) from PaleoScan to GeoTeric

New! GeoTeric Horizon Packs - interactive geological screening

- Create iso-conformant slices using the Iso-Proportional Slicing Tool
- Instantly scroll through Horizon Packs to view colour blend results in a stratigraphically conformant manner, with playback functionality.

Updates! - further usability enhancements to wells, Spectral Expression and surface overlays
