

Teric

3-6th August, 2015

SBGf Theatre Schedule

Tuesday 4th August 2015

10:00 Cognitive Interpretation™ in GeoTeric®

Harness your cognitive capabilities using GeoTeric's uniquely designed, cognitively intuitive software to achieve an improved interpretation. Cognitive interpretation is an alternative interpretation methodology- join us to see how GeoTeric can provide you with tools essential for an improved interpretation.

11:00 Workshop - Data Conditioning in GeoTeric®

During this short workshop, see for yourself how you can enhance your seismic data using GeoTeric's unique Noise Expression and Spectral Expression tools.

14:00 Workshop - Frequency Decomposition in GeoTeric®

Learn all about GeoTeric's SDFD & High Definition Frequency Decomposition, which using high resolution colour blend technology, produces highly detail images of the geology in both traditional and broadband seismic data.

15:00 Workshop - Adaptive Geobodies

With patented Adaptive Geobodies, delineation of geological features is fast and robust. See it in action in the short workshop.

16:00 Geological Modelling with GeoTeric®

Join us to learn how GeoTeric's workflows can provide more confident interpretations for input into geological models.

Please join us at booth #48A

Teric

3-6th August, 2015

SBGf Theatre Schedule

Wednesday 5th August 2015

10:00 **Frequency Decomposition in GeoTeric®**

Learn all about GeoTeric's SDFD & High Definition Frequency Decomposition, which using advanced frequency splitting techniques, produces highly detailed images of the geology in both traditional and broadband seismic data.

11:00 **Workshop - 4D Workflows with GeoTeric®**

GeoTeric can be used very effectively in a multi-attribute environment to screen for differences in AVO, 4D or Multi-Azimuth responses.

14:00 **Workshop - Adaptive Geobodies**

With patented Adaptive Geobodies, delineation of geological features is fast and robust. See it in action in this short workshop.

15:00 **Workshop - Fault Expression & Structural Workflows**

Fault Expression recognises that the seismic expression of faults can be highly variable and provides an interactive method for structural analysis. Learn all about it in this short workshop

16:00 **Cognitive Interpretation in GeoTeric®**

Harness your cognitive capabilities using GeoTeric's uniquely designed, cognitively intuitive software to achieve an improved interpretation. Cognitive interpretation is an alternative interpretation methodology- join us to see how GeoTeric can provide you with tools essential for an improved interpretation.

Please join us at booth #48A

Teric

3-6th August, 2015

SBGf Theatre Schedule

Thursday 6th August 2015

10:00 Workshop - Frequency Decomposition™ in GeoTeric®

Learn all about GeoTeric's SDFD & High Definition Frequency Decomposition, which using advanced frequency splitting techniques, produces highly detailed images of the geology in both traditional and broadband seismic data.

11:00 Geological Modelling with GeoTeric®

Join us to learn how GeoTeric's workflows can provide more confident interpretations for input into geological models.

14:00 Workshop - Adaptive Geobodies

With patented Adaptive Geobodies, delineation of geological features is fast and robust. See it in action in the short workshop.

15:00 Workshop - IFC+

IFC+ brings together the power of interactive, data-driven, interpreter guided classification with the ability to objectively interpret geology using GeoTeric's colour blends. Learn all about it in this short workshop.

16:00 Cognitive Interpretation in GeoTeric®

Harness your cognitive capabilities using GeoTeric's uniquely designed, cognitively intuitive software to achieve an improved interpretation. Cognitive interpretation is an alternative interpretation methodology- join us to see how GeoTeric can provide you with tools essential for an improved interpretation.
