

# 10th Annual Technology Forum

170 Queen's Gate, Imperial College, London

12th April 2016

9:30	Registration	Arrival tea & coffee and a Danish pastry to set you up for the morning
10:15	GeoTeric	Introduction
10:30	GeoScience Limited	Evaluating the gap between seismic scale and well scale observations of structure, a North Sea case study
11:00	Lyme Bay Consulting	Rapid exploration portfolio building through the use of multiple seismic attribute analysis
11:30	GeoTeric	What's New in GeoTeric® 2016.1
12:00	Lunch	Buffet style lunch will be served in the foyer
13:00	GeoTeric	Determining depositional history through the use of Cognitive Interpretation workflows
13:30	Saudi Aramco	New insights brought by high definition seismic attribute workflow on the Cenozoic carbonates of NW Australia
14:00	Corfield Geoscience Ltd	Seismic attributes and spectral decomposition in frontier exploration: an example from West Greenland
14:30	Break	It's a birthday and it calls for cake, which will be served with tea & coffee in the foyer.
15:00	Maersk Oil	The danger is not in the deep: using GeoTeric for shallow hazard identification
15:30	GeoTeric	Frequency Decomposition RGB Blend calibration using Forward Modelling
16:00	GeoTeric	Round Up
16:15	Drinks & Nibbles	A selection of drinks and nibbles will be served while you mingle
