5Share Island Groups

MAXIMIZE YOUR RESOURCES WITH COLLABORATION

5Share Island Groups are collaborative peer groups comprised of school district officials who are focused on using data to make more informed decisions. By utilizing a private 5Share group to collect data at the local or affinity group level, Island Group members can easily compare to one another using custom analytics that add value to a 5Sight subscription. Being part of your own group provides a unique opportunity to share real-time data that your group deems essential. Island Groups enhance the ability to collaborate with your selected peer group and provide significant time savings related to using data.

DATA COLLECTION

Forecast5 works with your group to build data collection templates specific to your needs. Surveys are warehoused in one central location, saving you and your staff valuable time.

CUSTOM ANALYTICS

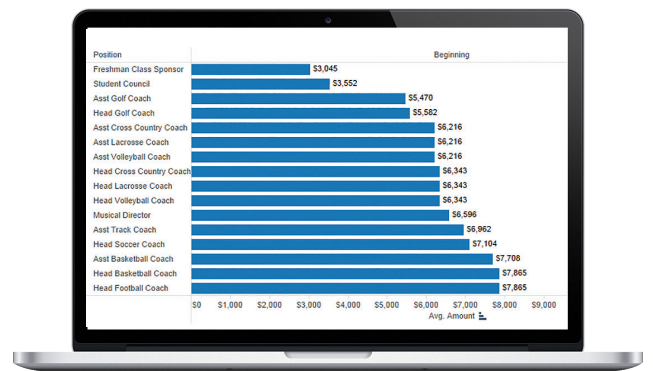

After your group populates each new custom dataset, Forecast5 engineers the data into brand new 5Sight analytics exclusively for your group.

DOCUMENT STORAGE

Your group will have its own central repository of documents stored within 5Share for private access by group members. Examples include teacher contracts, job descriptions, RFPs, etc..

COLLABORATION

A group discussion board is provided for collaboration purposes and to discuss key issues. An organized and searchable archive of discussions helps maximize communication efficiency.

“Island Groups are a tremendous opportunity to work together and maximize the use of data to find efficiencies and optimize resources. By partnering with Forecast5, we are now able to work more efficiently together to the benefit of our communities and students.”
