Rego's Rally Migrator

Migrate Rally Software® Data with Rego's Workspace-Crossing Solution

Does your organization need to migrate data between workspaces? Moving data across workspaces can be tricky, but Rego's Rally Migrator simplifies and expedites this process.

Features

- Preserves references, including hierarchical artifact relationships
- Moves objects from one workspace or subscription to another
- Migrate attachments while maintaining their relationship to work items

How We'll Do It

- One-day remote assessment
- Determine scope for objects, attributes, and lookups
- Manual migration of attributes and lookups
- Automated workspace migration

COST: $12,000

Workspace 1   **Workspace 2**

Project/Workspace Migrator

Use Case

A large electronics company recently spun off a new line of business. They wanted to migrate existing users and workspace data to a new Rally subscription. Rego's Rally Migrator eliminated the need to import or export data manually, enabling a quick transition with little impact to its users.
