Let Rego Be Your Guide

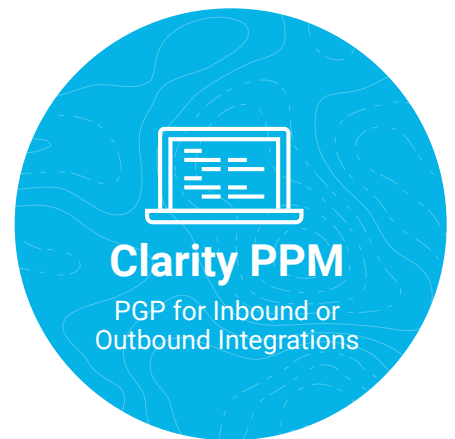

Announcing Flat File Encryption for Clarity PPM

Reduce Risk and Ensure Compliance with Rego Encryption

At Rego, we understand the risk of unsecured data and the potentially significant losses caused by a data breach. In response, we developed a solution to support PGP (Pretty Good Protection) encryption, the gold standard in encryption, for any Rego Inbound and Outbound flat file integrations for Clarity PPM.

Rego is the **only company in the world** that supports PGP encryption for both inbound and outbound flat file data integrations in Clarity PPM.

Add PGP to Rego Integrations	Replace Global Delivery Solution + PGP	New Integrations Implementation + PGP
<ul style="list-style-type: none"> • Add PGP encryption to the Rego Inbound and/or Outbound flat file integrations • 15 hours implementation and configuration • Additional configuration hours billed on a time and expense basis (if needed) 	<ul style="list-style-type: none"> • Replace existing integration solutions created by Global Delivery with Rego Inbound and/or Outbound flat file integrations • Add PGP encryption • Additional configuration hours billed on a time and expense basis (if needed) 	<ul style="list-style-type: none"> • Implement Rego Inbound and/or Outbound flat file integrations • Add PGP encryption • Additional configuration hours billed on a time and expense basis (if needed)
Add PGP: \$3,000	Replace Integration: \$3,000 Add PGP: \$3,000	Implement Integration: \$8,000 Add PGP: \$3,000
