Plus:

improved print quality!

✓ **Sharper type**
✓ **Richer black**

**Printware** Do More With an Envelope

iJetColor Flow

This new workflow design simplifies and condenses operational steps for fast and profitable inkjet output.

Inkjet-Optimized Toolset

The toolset deploys unique color profiles optimized for consistent color of the inkjet color matrix on a wide range of stock, especially envelope and stationery products.

Intuitive Operator Interface

A new, simplified design presents basic operational statuses and commands, the interface allows the most trained technician to front office staff to print with ease.

Windows 10

Installed, tested, and ready to use on a powerful, networked-based CPU solution allowing remote designers and equipment operators to share jobs for fast and consistent output, maximizing the productivity of each high-speed, iJetColor engine.

Available Add-Ons

The easy-to-use iJetColor Flow is designed for simple, consistent output with little user intervention, yet offers powerful advanced imaging add-ons including:

✓ PMS Spot Color-Matching

✓ Advanced ICC Profiles

✓ Hyper-Speed Variable Data Processing

✓ Unlimited Print Queues
