

Cegeka pursues a strategy that revolves around continuous investment, improvement and innovation. It is a strategy that bears fruit, as is yet again reflected in our annual figures: 511 million euro in revenue, an increase of 16% compared to 2017. This is the 15th year running we can report solid growth, and I am proud of that.

2018 is also the year in which I decided to step aside as CEO and hand the reins to Stijn Bijmens. A fully-fledged entrepreneur, Stijn has the leadership skills, the business acumen and the IT expertise that are crucial for steering Cegeka through these fast-paced, volatile and exciting times.

Stijn will decidedly make his own mark, but I know he will stay true to the fundamentals of our *modus operandi*: cool pragmatism and a customer-centric approach. Our baseline 'In Close Cooperation' remains unchanged and is as relevant as ever: Stijn and I firmly believe that it is our accessibility, our transparency and our empathy that are the keys to our success.

I want to express my gratitude to all our customers for their continued faith and loyalty in Cegeka. Thank you also to the more than 4000 Cegeka employees who create tangible impact for our customers, every single day. A final thank you to our shareholders, investors and business partners, without whom this adventure would not be possible.

André Knaepen
Founder & Chairman of the Board

We have exciting times ahead of us.

As consumers, we have witnessed a number of seismic shifts over the past decade: how we communicate and shop, for instance, has changed drastically. Mobile devices, 24/7 online stores and social media have transformed our lives significantly.

We don't quite see the same kind of leaps and bounds when we look at enterprise IT. In the core, very little has changed in that domain: we still develop applications more or less like we did ten years ago, we still talk about ERP and CRM systems, infrastructure and so forth.

It is my belief that this is going to change. Indeed, it is already changing. And the tilt in business IT is the result of two technologies: the ever-growing world of cloud and the advent of 5G. Combined, they will change enterprise IT completely. **5G will give the cloud eyes and hands.**

“5G will give the cloud eyes and hands”

Cloud: bringing order to the chaos

Nowadays, many CIO's can't see the wood for the trees in the cloud landscape. Which applications their organizations have running – and especially: where – has become hard to untangle, due to the rise of the public cloud and shadow IT. The result is cloud chaos. To bring order to that chaos, to make it transparent, manageable, stable but also malleable, that is the challenge. A challenge Cegeka is more than ready to take on.

Our approach is straightforward: we do for our customers what we think is best in the circumstances. What that 'best' is, is something we look at from a sober, economic point of view. We help customers design the cloud landscape that best fits their needs, with the exact right mix between public cloud, on-premise and private data center. In doing so, there are various things we manage: security, no lock-in, flexibility and compliance, to name just a few.

5G: the powerhouse behind the digital ecosystem

The advent of 5G will result in a gigantic data explosion, triggered by sensors and chips in millions of devices and machines. We can already see this happen in a number of verticals such as smart cities, mobility, connected health and farming. This begs the question: Where to go with all this data? Some parties involved might want alternatives to exporting the data to one of the major public clouds.

This is another domain in which Cegeka wants to create tangible impact. We are committed to helping our customers design and build secure and performing digital ecosystems, which will allow them to set up their own vertical mobile networks. In these networks, our customers will be able to process, manage and, if necessary, store this data. Securely, flexibly and compliantly.

A holistic approach to IT

Another aspect that will continue to gain importance is a holistic approach to IT. Business IT has become so complex and interconnected, it requires not only deep but also broad knowledge and expertise. That is why Cegeka keeps investing in a wide range of IT solutions and services: from applications and infrastructure to IT consultancy and emerging technologies.

We also see the importance of this in our innovation projects. At Cegeka, everyone is aware of the fact that the solution for a problem will most likely reside in a combination of technologies, rather than in one single technology in particular. Blockchain or Artificial Intelligence in themselves will seldom provide a solution. Again, it is this holistic view that allows us to approach and industrialize innovation in a manner that yields business results.

In Close Cooperation

For more than 25 years now, 'In Close Cooperation' has been the motto and modus operandi of our executive chairman and former CEO André Knaepen. It is part of the DNA of every single employee at Cegeka. The same goes for a no-nonsense can-do attitude, a customer-centric approach and a healthy dose of business flair.

Maintaining close relationships with our customers, being open and accessible, able to work together in mutual trust and complete transparency: in this family business it has always been and will continue to be of the utmost importance. I find it important that our customers are able to put a name and a face on the Cegeka people they work with.

This focus on people – our customers and their customers, our employees, business partners, stakeholders and investors – has been the key to our success for over a quarter of a century. I am extremely proud to be able to be of service to such a large group of talented people, and to be able to lead Cegeka ahead in such promising times.

Vision

IT is about people. Everyone – consumers, citizens and office workers alike – wants to have frictionless and highly personalized digital experiences. People don't want technology, they want seamlessness, safety and speed, and they want it anyplace, anytime and on any device.

As a b2b IT solutions provider, our customers are businesses, organizations and governmental agencies. They, in turn, serve other businesses, consumers and citizens. Today, we are witnessing a shift: it's not just our customers we're being of service to, we're being of service to the customers of our customers, and increasingly so.

We do this in a world which is highly digitized, increasingly connected and constantly changing at lightning speed. A world in which cloud chaos and shadow IT are creeping up on organizations. A world also, in which gravitational forces, such as day-to-day and financial operations, are slowing businesses down.

In this constellation, it is our mission to help our customers focus on their core business. So they can maintain a high level of operational efficiency, keep a sharp competitive edge, and have the bandwidth to keep innovating as their company grows.

Mission

As a family-owned IT solutions provider founded on craftsmanship, we work in close cooperation with our customers.

We help businesses, organizations and governmental agencies create frictionless and personalized experiences for their customers, for consumers and for citizens.

It is our ambition to become the leading European orchestrator of digital business platforms and ecosystems in our focus markets.

In Close Cooperation

We provide solutions which accelerate growth and guide businesses towards digital relevance.

We do so in the belief that the power lies in the combination of technologies, trends and skills.

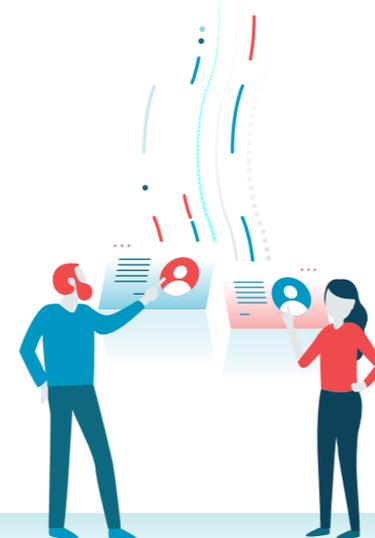

We navigate the cloud landscape with confidence and conviction, unlocking possibilities and uncovering what lies 'beyond'.

We industrialize applied innovation to maximize business impact. We demystify trends and technologies as we go. Our aim is to deliver.

We believe in the power of digital platforms and ecosystems. We want to connect people, things and businesses in order to exchange value among all partners.

Retrospect 2018

Zander Colaers
Country Director The Netherlands,
COO Infrastructure Cegeka Group

2018 was a profitable year for Cegeka in The Netherlands and for all our business lines: infrastructure, applications, business solutions and professional services.

From an infrastructure point of view, we are increasingly focused on cloud orchestration. This means we are taking our position as 'hybrid cloud provider' to a higher level: we are cloud managers, consultants, integrators and orchestrators all-in-one. Our core aim is to 'unburden' CIOs, so they get more bandwidth to focus on core tasks, such as the digitization of processes, products and services.

Our Applications division focuses on application management, agile development and DevOps containerization. We have invested considerably in the Outsystems platform, which is designed to build enterprise-grade apps very fast. Our DevOps teams have done a tremendous job, helping customers set up DevOps-environments as well as Managed Container Platforms.

The Business Solutions division has worked hard on setting up several Microsoft Dynamics 365 competence centers. The division offers business solutions for specific sectors, of which food manufacturing is but one. Our approach - which is based on pre-configured and pre-defined templates - shortens the implementation cycle considerably, which is a huge competitive advantage.

Professional Services includes a broad range of skills and capabilities around a wide range of technologies. Our unique asset is the ability to deliver a wide range of specific skills fast. In a world which is characterized by a relentless and unabating War for Talent, this is crucial.

"In close cooperation" has been the motto of Cegeka for more than 25 years. Superb customer experiences, high customer satisfaction, and continued customer loyalty are the pillars on which our future is built. Our main asset is and remains our people. It is their continued motivation and dedication that is the driving force behind our success.

Our offices

Milestones 2018

1

Extension of our customer portfolio, including NIBC and Garantibank (banking sector), Alrijne and Ipse De Bruggen (hospital/healthcare), Reesink (import agricultural machinery) and Nature's Pride (import/supply fruit).

2

High scores in the Quint Whitelane Customer Satisfaction Survey for IM (Infrastructure Management) and EUM (End User Management), with a top 5 position in the Netherlands.

3

Continued investment in the ongoing development of our employees, in alignment with our "CEO of your Career" Employer Value Proposition.

Solution portfolio

IT Infrastructure

Consultancy

Consultancy on infrastructure issues, such as: security and DevOps; consolidation & virtualization; business cases on IT workload positioning in multi-cloud

Outsourcing

- End-to-end outsourcing of workplaces & data center infrastructure, technical application management
- On-site management of infrastructure components

Infra Projects and Hardware

- Selling, installation & configuration of hardware solutions
- One-stop-shop project management for designing, implementing & integrating complex infrastructure & data center solutions

Applications

Solutions designed for the public, social and private sectors:

- Development and implementation of custom applications (software factory)
- Coaching & training of customers during agile transformation projects
- Full application outsourcing (application management)
- Solutions for digital marketing & digital experience
- Solutions for the 'Connected Organisation' & 'Smart Workplace'
- Office 365, content management systems, e-commerce

Digital solutions for hospitals, health care professionals & laboratories

Business Solutions

- Microsoft Dynamics 365
- Microsoft Dynamics 365 - ERP
- Microsoft Dynamics 365 - CRM
- Data Intelligence

Professional Services

IT Consultancy Services

Innovation

Dedicated focus on the exploration on new technologies with the aim to be first mover

- DevOps
- Internet of Things
- Machine Learning & Artificial Intelligence
- Security
- Blockchain

Cegeka Ecosystems

Tailored and proprietary vertical IT solutions for

- Real estate (cegeka-dsa)
- Health sector (nexuzhealth)
