

 RevStream ERLM Suite  
**RevStream for NetSuite**

As a pioneer and market innovator in the Enterprise Revenue Lifecycle Management category, RevStream continues to lead the way as the first advanced revenue recognition solution to be seamlessly integrated, tested and “Built for NetSuite” verified.

## OVERVIEW

RevStream’s unique capability allows NetSuite customers to leverage your existing ERP investment to produce a complete solution from Revenue Recognition and Fair Value Analysis, to Revenue Schedule transfer and close in NetSuite GL—a process that is accurate and cost efficient.

As a premier revenue automation specialist and SuiteCloud Developer Network Partner, our RevStream GL Connector is the only advanced revenue recognition SuiteApp to achieve “Built for NetSuite” certification. This verifies that our application meets NetSuite’s standards and best practices, giving NetSuite customers additional confidence in choosing RevStream for your revenue recognition solution.

## BENEFITS

### Automation and Process Simplification

- Automatically import revenue recognition journal entries at period end into NetSuite GL as a scheduled or ad-hoc process

### No Integration Required

- Embedded app accessed via a native tab in NetSuite application
- No need to write queries or format/reformat data

### Single Sign-On

- Authenticated for secure and private access to revenue schedules from RevStream once logged into NetSuite

### Quick Deployment

- Offered as a NetSuite managed bundle for easy single or multi-entity deployments
- Available to download from the NetSuite SuiteApp Partner online store

### Flexible

- Easy parameter changes to account for entity or chart of account changes

## KEY FEATURES

### Auto-Connection to Your RevStream Data

- Automatically connects to RevStream to retrieve revenue recognition journal entries
- Pre-mapped to required Journal Entry (JE) record fields
- Flexible data mapping fields for additional JE details

### Secured Web Services to RevStream

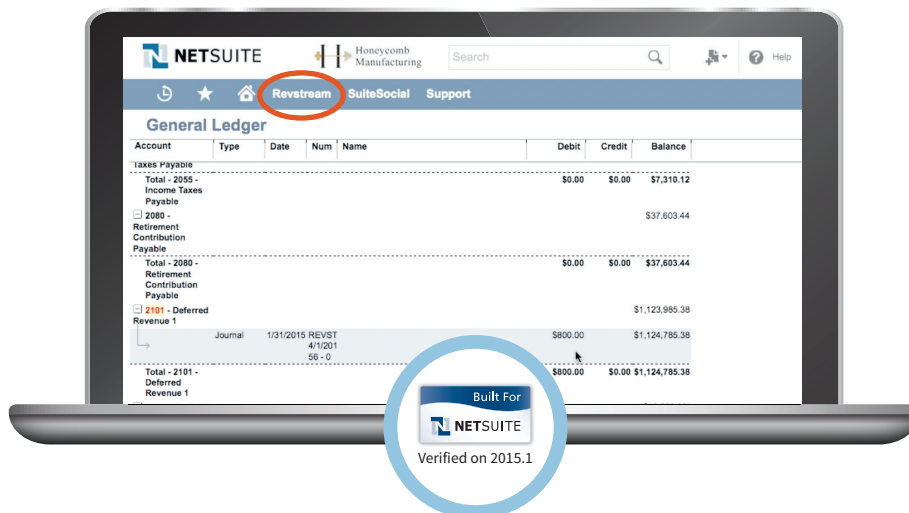

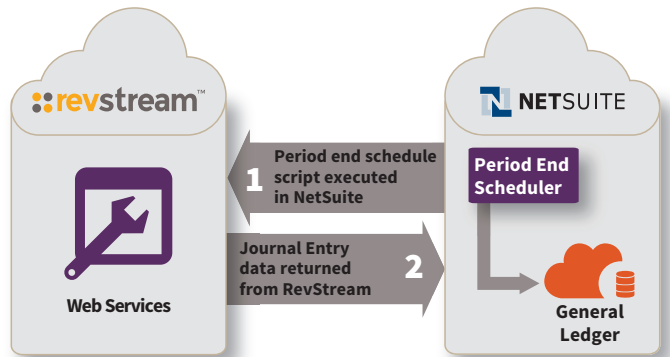

- REST-based web services for performance, scale and security

### Automatic Booking of Journal Entries to GL at Period End

- Connector can run on automatic schedule or on-demand at financial period-end to book the RevStream revenue schedules as journal entries into NetSuite GL

## HOW IT WORKS

The RevStream-to-NetSuite outbound GL connector is designed for period end transferring of revenue recognition results as journal entries into the NetSuite General Ledger. This can either be an automated period end process scheduled to run regularly, or an ad-hoc process which a NetSuite user can execute at any point in time.

RevStream is the leader and market innovator in Enterprise Revenue Lifecycle Management. We provide financial organizations with a single, comprehensive and flexible platform for managing risk, making accurate forecasts, and ensuring compliance when accounting for revenues across a wide range of industries and monetization models.

Only RevStream delivers the solutions and domain expertise companies need to fully automate Revenue Recognition Management.
