ACCOUNTING HUB

PRODUCT TRAINING

COURSE OVERVIEW

Aptitude Software offers courses that meet the needs of different user roles. Learning tracks are designed to start with a common essentials course that introduces the users to Aptitude Accounting Hub (AAH) processes and configurations followed by subsequent modules that are grouped for role specific accreditation.

Accreditation is granted to an individual, not to the organisation or client, for a particular version of the Aptitude Software product and at a particular level. Courses include written and practical examinations.
