An intelligent solution to support your return to business strategy

People are counting on their employers to help them get back to business safely. The spread of COVID-19 remains a risk but technology can help you to reduce the spread and reassure the people on your premises.

Vodafone Heat Detection Camera Solution

An end-to-end solution that can **quickly, discreetly and accurately screen people for high body temperature** – a symptom of COVID-19 – so you can help reduce the spread on your premises.

- Screen up to 8 people at a time and **100 people every minute**
- Keep your staff where you need them most as the cameras **require no supervision**
- Rely upon **the only commercially available solution** that has an integrated management and alerting system
- **Manage multiple cameras** across multiple sites via a single tablet
- Receive **peace of mind** with 24/7 technical support and next working day on-site repairs
- Maintain complete control over captured data with **end-to-end encryption**

How it works

Identify people who may have COVID-19

Detect those with high body temperatures using intelligent thermal and HD cameras, with 0.3°C accuracy.

Take immediate action

Receive **discreet automated alerts** via a secure, centralised console so you can take preventative action to reduce the potential spread of COVID-19 on your premises.

Be up and running fast

Installed **within two hours**, the standalone solution needs no IT integration, so you can stay focused on your business priorities.

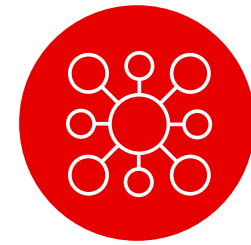

Suitable for:

- Reception, concierge and security
- Hospitals and blue light services
- Local authorities
- Banks and building societies
- Public transport
- Utilities

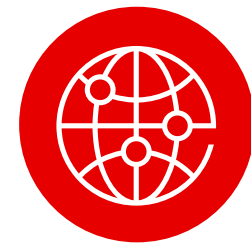

Why Vodafone for Heat Detection Camera Solution

The only intelligent, connected heat detection solution available

Easy to use and manage with secure, remote monitoring

Enabled by an industry-leading IoT network

Stay connected from 2G to 4G, with no need for on-site WI-FI

Turn data into actionable insights

Analyse bulk data to determine trends and meet reporting requirements

Fully managed service

An end-to-end managed service solution managed onshore in the UK and by Vodafone's security cleared UK nationals

Pioneering partnership

Vodafone has partnered with Digital Barriers, a world leader in edge-intelligent solutions for the global surveillance and security market
