

MEDITECH SERVICES

The Link to Life-Saving Care

Our expertise comes from our healthcare heritage and delivers a fully integrated and comprehensive solution around the MEDITECH platform. Our services include assessments to planning to activation—design, workflow analysis, implementation, training, data conversions, launch, maintenance, support and optimization. From the selection of a single option through complete hosted and managed MEDITECH, we give you the flexibility and options needed in today's changing healthcare space.

Certified

Our team is certified by MEDITECH to deliver “READY” Levels 1-4 and Pathway Implementations for the Expanse platform allowing you to focus on adoption and quality of care instead of complex IT issues. We also provide technical, upgrade, and optimization services to ensure you get the most from your MEDITECH platform investment.

Experienced

We have implemented and utilized MEDITECH in the largest hospital company in the US with team members that have worked daily in hospital settings across the country and bring a unique end-user perspective. They understand the situations and challenges that have to be overcome daily.

Invested

We've made a substantial investment in a state-of-the-art MEDITECH Expanse Test/Train environment including core third party applications that allows us to proactively minimize your risk and maximize your results. This new environment allows you the opportunity to gain essential hands-on experience prior to and during implementation to ensure complete understanding of the applications within MEDITECH.

Discover how we can work together.

> OUR SERVICES

We selected CereCore because they brought the management expertise to the table, have done similar projects and have been working with MEDITECH for a long time. They also brought a large amount of manpower, which we could not generate within our organization while still maintaining patient care. It was a true partnership.
