

Did you put new technology on your Christmas wish list? Read on.....!

CoreTech Solutions are pleased to announce we now offer a range of flexible payment plans for a range of technology solutions. If your Shopping Centre is exploring options to upgrade any technology on site, leasing should be a consideration – we offer Fibre Network Infrastructure, Wi-Fi Provision, Access Control and CCTV in our bundled products.

Leasing provides a number of advantages over owning equipment as well as the ability to include other services such as support and maintenance.

Benefits include:

- **Budget Control** - Fixed lease payments allow for greater budget control across a defined period. Lease agreements can be assigned to new owners/agents should circumstances on site change.
- **Flexibility** – Fibre Network Hardware, Data/Bandwidth and Services such as Maintenance and Support can be bundled into the plan if required. At the end of the payment plan equipment can be leased at a nominal rate.
- **Comfort** – Take advantage of full use of the equipment safe in the knowledge they are fully warranted and supported without the burden of ownership and managing multiple partners and vendors.
- **Secure and Eco Friendly** – At the end of the agreement CoreTech Solutions can safely and securely dispose of the equipment

CoreTech Solutions are market leaders in the UK Shopping Centre market designing, delivering and supporting network infrastructures and all IP based technologies.

The Solution:

CoreTech are Excel partners and therefore can offer a world-class premium performance **end-to-end infrastructure** solution and design, manufactured, supported and delivered and without compromise in **new scheme developments** or **existing properties** whilst minimising disruption to critical systems that were reliant on the current infrastructure.

CoreTech is driven by a **team of industry experts**, ensuring the **latest innovation** and manufacturing capabilities are implemented to surpass industry standards for quality and performance, technical compliance and ease of installation and use.

Our emphasis is on **compatibility** and standards compliance 'from cable to rack', **reliability** and **product availability** with new networking infrastructure or extend the current site fibre optic network backbone.

The Benefits:

With CoreTech's experience of new site installation and retro fitting of systems into established locations we are able to install the most complex systems without disruption to the sites day to day operations.

The Expertise:

- 20 years for system design, deployment and support
- PRINCE2 Qualified Project Team
- Fully Qualified on-site Engineers with CSCS, IPAF, UKATA
- Excel data cable manufacturer approved
- Centralised storage and warehousing facility
- Staging and shipping experts
- Electrical approval to the NIC-EIC standards
- ISO9001:2008
- Online client CRM portal with full ticket tracking and stock function

More Information:

While the concept of IoT within property is straightforward, the planning, deployment, implementation and management of the enabling resources can be a challenging journey through both new and existing physical structure, difficult environmental conditions, numerous construction phases while meeting the latest in regulatory compliance.
