

**GENESIS**  
INTEGRATION

# Client Case Study

Lillian Osborne High School

## Client Case Study

**Client:** Lillian Osborne High School

**Location:** Edmonton, AB

**Market:** Education

### Tech Talk

Genesis Integration's solution to the project specifications included communications cabling, Bogen integrated communication and clock systems, cable television cabling, TOA gymnasium sound system, classroom amplification, DSC/Kantech access control and DSC intrusion detection.

Genesis was very much up to the task, deploying a highly skilled team to ensure on-time completion of the project.

### The Challenge

Lillian Osborne High School was the first new Edmonton High School construction project in 25 years. Prior to opening its' doors, Genesis Integration was tasked with providing a wide range of integrated communications, security and audio solution for the new school.

The challenge for Genesis was to meet the demands of a modern high school with full service systems to accommodate the needs of a 1000+ student campus.

### The Result

As with any project of this magnitude there were issues along the way but Genesis never broke stride and the overall goal of delivering a quality integrated solution in a timely manner was accomplished.

Situated in Edmonton's southwest Terwillegar community, Lillian Osborne has become a highly sought-after destination for students since opening its' doors and Genesis is extremely proud to have been a part of bringing this beautiful educational facility to the residents of Edmonton.
