Uprise is Designed to Improve The Way You Practice

Designed by ODs for ODs

We set out to improve the way ODs practice with easy navigation, faster exam documentation, and Hands-free MIPS℠ compliance tracking. We embedded common tools you nee to run a practice so you don't have separate payments and tools to manage.
Enhanced Workflow

Uprise is packed with efficient features like SmartTouch EHR℠, which assigns codes based on symptoms and severity. In a few taps, your exam is documented, the invoice is populated, and the claim is ready to submit.

Hands-free Updates

We listen to user feedback to implement the most important requests to our users every month. And, because Uprise is a cloud-based system, updates happen more frequently and seamlessly without any action from you and your team.

Multi-Platform, Multi-Device Access

The Uprise EHR works on your tablet, laptop, and desktop. Whether you are a Mac or a PC user, or prefer to use an iPad or Android tablet, you can quickly click, tap, or swipe your way through the system.

Software Features

PATIENTS
View complete, data-rich profiles for every patient. These profiles make managing patient information, reviewing timelines, and staying organized a snap.

PRODUCTS
We've created a system to help with everything product related. You can manage your inventory, submit orders to your suppliers, and get order status in real-time.

SCHEDULER
Stay on top of your day with our customizable scheduler. You can tailor virtually every setting, and you get flexible viewing options to match your preferences.

CLAIMS
Easily submit and track insurance claims without leaving Uprise. File claims, receive EOBs, manage ERAs, and view claim summaries—all with the click of a mouse.

EHR
Move through the patient encounter smoothly, with fewer clicks, using our state of the art EHR. It's robust in functionality and practical in workflow.

REPORTS
Our operational, financial, auditing, and analysis reports give you the visibility you need to identify and correct issues before they chip away at your bottom line.

OPTICAL/CHECKOUT
Maintain control of every aspect of your practice's cash flow with a complete tool for managing invoices, quoting, recording payments, and handling adjustments.

PATIENT PORTAL
Delight your patients by communicating and educating through our patient portal. They can fill out questionnaires, review exam history, access educational material, and more.

See for yourself the impact Uprise has had on one of your peers:

> My staff and I can manage and track a patient's journey from check-in through check-out all from one window, cutting down on having to learn multiple tools or memorize different logins. Because Uprise is an all-in-one solution, we don't have to manage different invoices or worry about integrations working correctly. More importantly, we were able to add three more exam slots each day and add $21k in revenue each month.

Dr. Matt Stanley, Eye Care Associates of Manhattan, PA

✓ **Frame Catalogs**

✓ **Patient Recall and Reminders**

✓ **Patient Education**

✓ **Code Verification**

Uprise Embedded Tools

FRAMES CATALOGS
Uprise is bundled with frames catalogs that eliminate data entry, allow for scanning frames in and out of inventory, and calculate retail pricing.

PATIENT RECALL
Send automated emails and texts to your patients for reminders, recalls, and pre-appointments.

E-PRESCRIBING
Bidirectional communications with all-doctor drug history, submits Rx to the pharmacy, displays available formularies, and helps keep your patient safe from adverse drug interactions, and potential allergic reactions.

CODE VERIFICATION
Immediate alerts when there are incompatible CPT code combinations for services performed on the same day, or if a CPT and ICD combination is not allowed.

PATIENT EDUCATION
Interactive patient education helps patients partner with you to manage their conditions.

COST SAVINGS WITH UPRISE PRO
All of these embedded tools are included in your monthly fee, saving you upwards of $600 each month.
