Agenda

For your convenience, the course agenda for this Advanced Project Management I product training is presented below.

Day 1: The Construction concept and using quotations.

- Get ready with our Materials and Virtual PC
- General introduction to To-Increase and Construction.
- Managing the quotation
- Quotation setup
- Pricing
- Creating the quotation & WBS overview
- Construction template & Cost codes

Day 2: Tuning the quote, subcontracting and reporting.

- Tuning the quantities and pricing
- Creating the project structure
- Subcontract-management setup
- Managing the subcontract
- Subcontract quotations
- Reporting on-site working hours (daily and weekly timesheet)

Day 3: Progress, planning, inventory and logistics

- Progress billing for the contract
- Progress billing for the subcontract
- WBS quantity management
- Project Visual Planning
- Project inventory
- Project logistics

Day 4: Cost control and other features

- WBS cost control
- Manual projects
- Draft and publish

- Quantity types
- Options and alternatives

Optional fifth day for Equipment

- Equipment master data
- Create or purchase equipment
- Depreciation of equipment
- Equipment usage
- Equipment utilization
- Work orders for equipment

Equipment is a one day overview of Enterprise asset management with a key focus on a construction scenario with equipment. Equipment is optional. It can be left out or can be replaced with a more detailed standard EAM training. The latter will cost 2 days extra instead of 1. Check our website for the EAM agenda.

Prerequisites of knowledge:

The participant is expected to have knowledge of standard Dynamics 365 for Operations and especially on the Project management and accounting module.

Prerequisites of software:

To-Increase will provide access to a cloud based training environment.
