Purpose of this training:

During the Enterprise Asset Management/ Asset Service Management Training course, the student will learn all about Enterprise Asset Management/ Asset Service Management. This training comprises a theoretical part and a hands-on lab. The theoretical part will be explained during the online sessions, the hands-on lab must be done outside of the online course. Approximately two weeks after the last online training, a Q&A session will be planned to cover the questions of the hands-on lab.

The product training is primarily for Application and Presales consultants. The goal of the training is to understand the setup and processes within the Enterprise Asset Management/ Asset Service Management.
