Purpose of this training:

The trainer will address the fundamentals of business process management (BPM) using RapidValue and after the training the student understands the RapidValue concept and a value driven BPM approach, is able to setup Business Process Models, design and develop business processes and flow diagrams, will have the ability to apply RapidValue for scoping, managing requirements, managing testing and can create end user focused content.

Agenda

For your convenience, the course agenda for this RapidValue Extended Product Training is presented below.

Topics day 1

- Introduction to RapidValue
- Business processes
- Flow diagrams
- People & organizations
- Applications
- Managing Content
- Exercises
- Q&A

Topics day 2

- RapidValue Implementations
- Value-Driven Approach
- End User Focus
- Scope, gaps & requirements
- Test management
- Dynamics 365 Implementation methodology overview
- Exercises
- Q&A

Prerequisites of knowledge:

Basic knowledge of AX 2012 or Dynamics 365 is expected. Experience from AX or other ERP implementations is useful. Knowledge of BPMN or similar business process modeling languages is also very useful, but not required.

Prerequisites of software on your pc:

The RapidValue training is delivered online and demonstration including exercises by the trainer are carried out on a central RapidValue training server hosted by To-Increase. Exercises have to be performed on partners and/or customer's own MD 365 VMs in parallel or later. If this concerns an online training, Skype for Business 2015 or GotoMeeting are used for screen sharing and audio, depending on the size and preferences of the training group.
