Purpose of this training:

The trainer will address the fundamentals of business process modeling using RapidValue and after the training the student understands the RapidValue concept and is able to setup Business Process Models, design and develop business processes and flow diagrams and will have the ability to apply RapidValue for scoping, managing requirements and managing testing.

Agenda

For your convenience, the course agenda for this RapidValue product training is presented below.

Topics sessions 1

- Introduction to RapidValue
- Business processes
- Flow diagrams
- People & organizations
- Q&A

Topics session 2

- Managing Content
- End User Focus
- Scope, gaps & requirements
- Test management
- Q&A

Prerequisites of knowledge:

Basic knowledge of AX 2012 is expected. Experience from AX or other ERP implementations is useful. Knowledge of BPMN or similar business process modeling languages is also very useful, but not required.

Prerequisites of software on your pc:

The RapidValue training is delivered online and both demonstration and exercises are carried out on a central RapidValue training server hosted by To-Increase. No software installation is required for the training, other than the Remote Desktop Connection tool. Lync 2010 or GotoMeeting are used for screen sharing and audio, depending on the size and preferences of the training group.
