| Technology:  | Microsoft Dynamics AX 2012 CU7   |
| Length:  | 2*0.5 day excluding hands-on lab + 1 hour Q&A session 2 weeks after the training |
| Language:  | English  |
| Type:  | Course   |
| Price per trainee:<br><i>(excluding travel and expenses)</i> | EUR 399, USD 499 or 1 voucher  |

### Purpose of this training:

During the Product Engineering Training course, the student will learn all about Product Engineering. This training comprises a theoretical part and a hands-on lab. The theoretical part will be explained during the online sessions, the hands-on lab must be done outside of the online course. Approximately two weeks after the last online training, a Q&A session will be planned to cover the questions of the hands-on lab.

The product training is primarily for Application and Presales consultants. The goal of the training is to understand the setup and processes within the Product Engineering solution.

### Agenda

For your convenience, the course agenda for this Product Engineering product training is presented below.

### Topics

- Product Version Management
- Product Release Management
- Product Readiness
- Product Status Management
- Engineering Attribute Search
- Collaboration Workspace
- Engineering Change Management
  - Engineering change requests
  - Engineering change orders

### Prerequisites of knowledge:

The participant is expected to have knowledge of standard AX2012 and especially on the Product information management module.

### Prerequisites of software:

To be able to participate in this training, it is mandatory to have access to an installation of the ADM2012 and construction demo database (virtual machine). The installation manual of this is a part of the ADM2012 demo database installation package, which can be downloaded on request.
