

How to set the correct POS file format for Salling Group

This guide shows you how to get Salling Group POS reports for effectmanager.

POS data reports from Salling Group are sent automatically from Salling Group to effectmanager. The format for the POS reports is set from Salling Group.

If you are looking for a guide, that shows you how to upload your Salling Group files to the FTP-server, please see our guide [How to set-up Salling Group POS integration with effectmanager](#)

If you want to receive POS data from Salling Group to effectmanager, you need to set-up an integration from Salling Group the effectmanager FTP-server.

⚠ OBS! Before effectmanager can submit a request to Salling Group on POS data, you must have made an agreement with Salling Group on what reports you should receive.

The following POS reports are available for upload to effectmanager:

- **Articles:** Contains the articles that are delivered to Salling Group on your Supplier number. Salling Group sends POS data on the articles in this file.
- **Category:** Contains POS data for the categories you are active in.
- **Customer:** Contains customer traffic data on each product on a store level.
- **Sales:** Contains sales amounts and values for each product on a store level.
- **Stock:** Contains stock amounts and values for each product on a store level.
- **Store:** Contains a list of all Salling Group Stores.
- **Waste:** Contains shrinkage amounts for each product on a store level.
