

How to use promotion costs

This guide goes through the different promotion costs in effectmanager.

This guide is only of relevance if you have the promotion module in effectmanager.

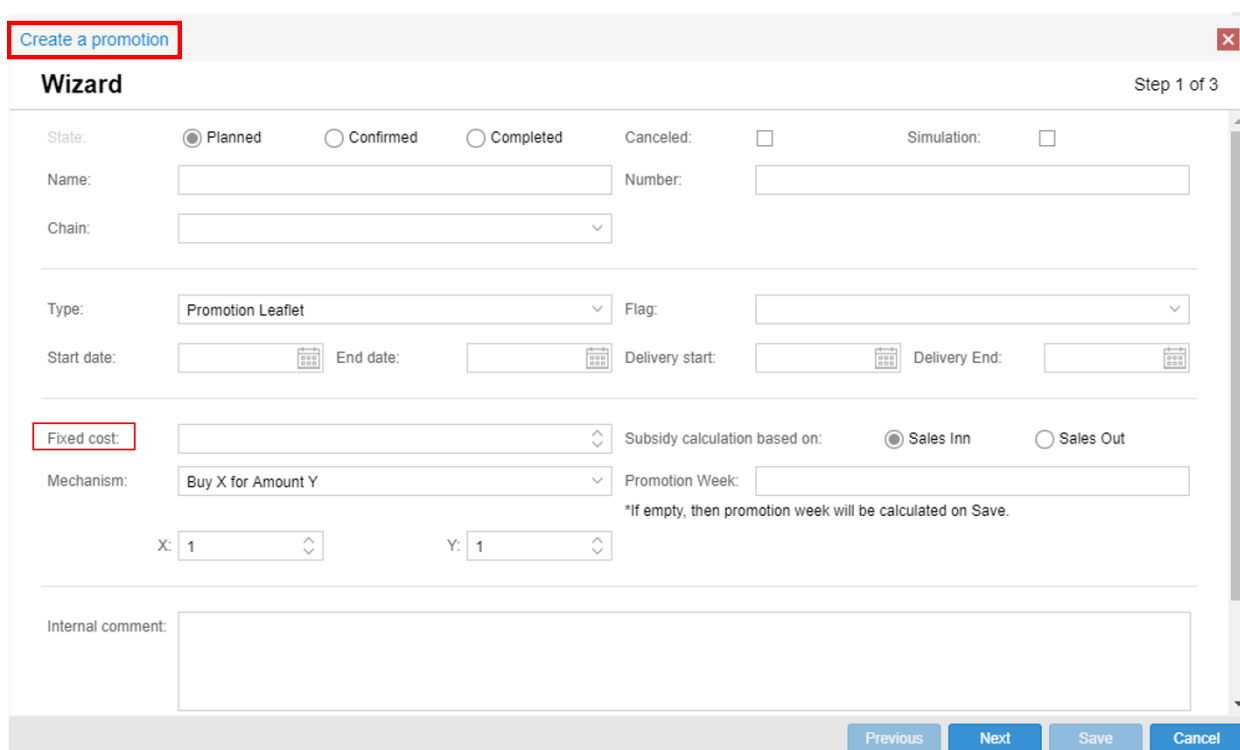

When creating or editing promotions in effectmanager, there are different promotion costs. Below we will go through the different promotion costs available in effectmanager. Costs in effectmanager can be divided into Fixed Costs and Subsidies.

If you are looking for a guide, that shows you how to create promotions in effectmanager, please see our guide [How to create a promotion in effectmanager front end](#)

Fixed Cost

Fixed Cost is the amount the supplier gives the chain to finance the promotion. The fixed costs added to the promotion will be visible as *Fixed Subsidy* in both Promotion Scheduler List View and in your Finance Report. In the two customer promotion reports, it is listed as *Promotion costs excl. VAT* in the summary section.

Fixed Cost can be added to a promotion on the first page when you create promotions.

Fixed Cost can also add it later when editing your promotion. This can be done in the General tab in the Promotion editor.

The screenshot shows the 'General' tab of the 'Promotion editor'. The 'Fixed cost' field is highlighted with a red box and contains the value '5000'. Other visible fields include 'State' (Planned), 'Name' (empty), 'Chain' (Bilka), 'Type' (Promotion Leaflet), 'Start date' (08/08/2019), 'End date' (08/16/2019), 'Delivery start' (07/25/2019), 'Delivery End' (08/16/2019), 'Subsidy calculation based on' (Sales Out), 'Mechanism' (Buy 2.00 for Amount 30.00), and 'Promotion Week' (2019/33).

Subsidies

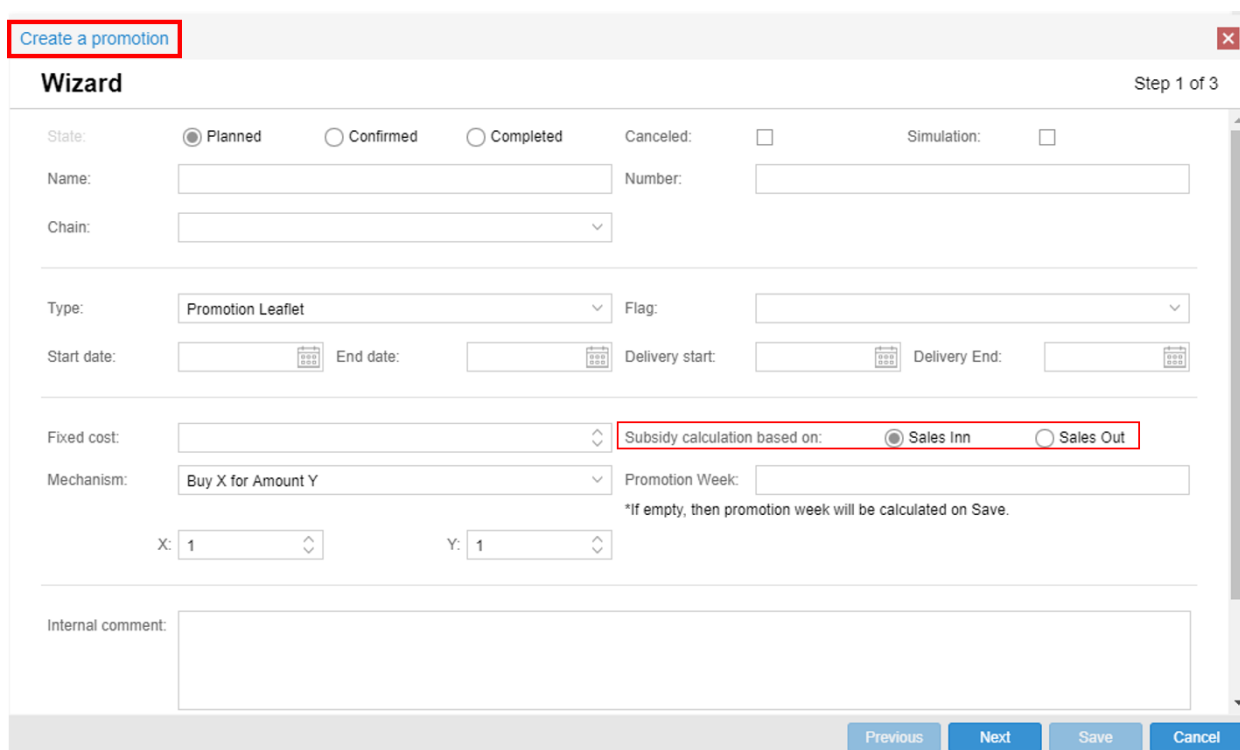

Subsidy calculation can be based on either piece sold to the consumer during the promotion period (sales out) or it can be based on pieces sold to the chain during the promotion (sales inn).

What the subsidy calculations are based on, is selected when creating or editing a promotion, in the General tab in the Promotion Editor.

The Unit Costs described below will be calculated based on your selected, as will your KPI calculations on your promotion reports.

If you need a guide, that explains KPI calculations in effectmanager, please see our guide [KPI Calculations - Sales Out](#) or [KPI Calculations - Sales Inn](#)

Fixed Cost can also add it later when editing your promotion. This can be done in the General tab in the Promotion editor.

Unit Subsidies can be added to the products in the Products tab in the fields *Unit Cost* or *% Cost*.

Unit Cost is the amount given by the supplier to the chain per piece sold in connection with the promotion. The Unit Cost is added to each Colli or unit. Unit Cost is added in Units and not in consumer units.

% Cost is the percentage of the billing price given by the supplier to the chain per piece sold in connection with the promotion. The % Cost is added to each Colli or unit. Unit Cost is added in Units and not in consumer units.

Name	ESP	ESP Promotion	VAT	*Unit cost	*% cost	Net billing price
> <input type="checkbox"/> Cherry & Pomegranate 0,5l	19.00		25.00	1.50		8.50
> <input type="checkbox"/> Cherry & Strawberry 0,5l	19.95		25.00	1.50	0.00	8.50
> <input type="checkbox"/> Grape & Elder flower 0,5l	19.00		25.00	1.50		-0.45
> <input type="checkbox"/> Natural 0,5l	19.00		25.00	1.50		8.50
