

# AlayaCare Data Exploration

Creating meaningful reports and actionable insights to enable decision support.

Watch Feature Video

AlayaCare's embedded Business Intelligence (BI) tool provides a suite of pre-configured reports, analytics and customizable reporting for all departments and functions within your company.

## Key Benefits

A single end-to-end software solution with integrated data exploration technology enables your home care organization to produce meaningful reports and consequently actionable insights to:

- ✓ Capture and measure key data elements
- ✓ Improve business processes and performance
- ✓ Make more informed decisions
- ✓ Create personalized dashboards
- ✓ Provide personalized customer experiences
- ✓ Realize evidence and outcome-based metrics

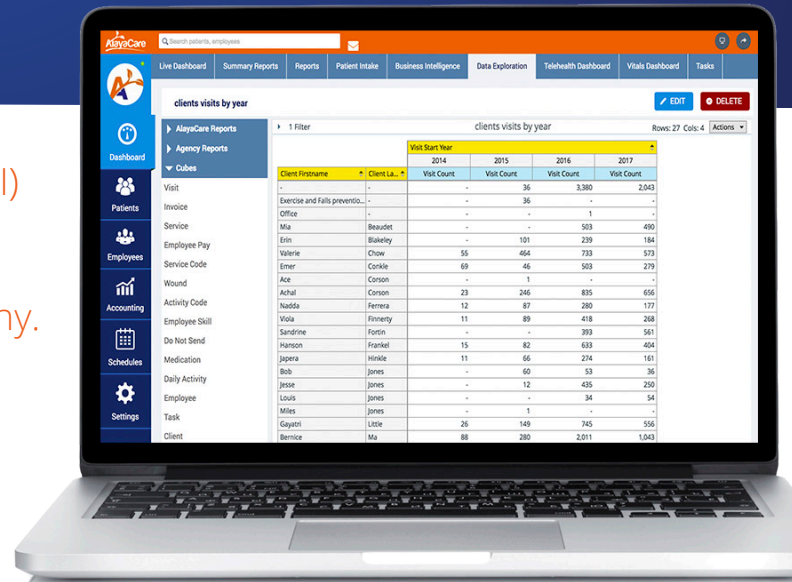

## Visualizations

Present data in visual formats, optimizing your view of relevant trends.

- A rich and extensible set of visualizations including multiple chart types and graphs
- Create and share dashboards
- Easily export in both PDF and Excel formats

Better Technology, Better Outcomes.

## Preconfigured Reports

Access to pre-configured reports built by AlayaCare.

- Based on industry best practices
- 40+ reports by function and department
- Trigger reports on prescribed timelines (daily, weekly, monthly etc.)

## Custom Reports

Build custom reports in your own environment using various data elements.

- Intuitive drag-and-drop functionality
- Pivot multiple data fields and measures
- Custom formatting capabilities
