

# KlayaCare ADL Management

A fully integrated care plan, scheduling, ADL documentation and task management solution to drive performance, compliance, and clinical outcomes.

Re-allocate QA and Supervisor resources courtesy of AlayaCare's reconciliation process that ensures ADLs are captured or commented upon at the point of care. Operate under a management by exception rule that will drastically improve chart auditing, pre-billing verifications and achieve perfect compliance.

"A deal breaker for me when selecting a platform was whether they had a mobile aspect. It's extremely important to be able to access information remotely and give our care workers this feature."

> Sebastian Ignacio Arasanz Director of Client Services Oakville Senior Citizens Residence (OSCR)

### Save Time and Increase Efficiency

- Leverage pre-configured ADL libraries or build your own with ease
- **Cluster ADLs** in groups based on assessments, service type and/or clinical pathways
- **Customize and personalize ADLs** on a 1 to 1 basis, tailor ADLs by day of week and time of day
- **Real-time communication** between supervisors and field staff
- Streamline reconciliation and quality assurance through batch approval process and exception handling
- **Synchronize, and integrate** care plans, scheduling and EVV (Electronic Visit Verification) to achieve efficient workflow
- Utilize pre-configured reports on individual clients and customize to your needs

Service task and ADL visibility within the Care Worker Mobile App

Better Technology, Better Outcomes. www.alayacare.com

## Simplify Care Giver Documentation

- Enable caregivers to add new ADLs at the point of care in real time (permission dependant)
- Keep employees informed in real-time with the mobile app solution enabling full access to their service tasks and up-to-thesecond updates anytime, anywhere.
- Leverage offline mode in areas of poor or no connectivity where clock-in/out, form completion and ADL charting are stored in natively on the application. Upload to the cloud once coverage is re-established.

### **Improve Compliance**

Satisfy CoPs (Conditions of Participation) courtesy of task management, workflow, alerts and reminders.

Take advantage of a digital/mobile system that ensures the following:

- POC (point of care) requirements, assessments and tasks
- Training and supervisory oversight
- Interdisciplinary notes and care coordination tools
- Build your own forms for discharge planning, Incident management
- Leverage mobile messaging for emergency preparedness
- **Ensure compliance** courtesy of required fields for task completion or comments
- Leverage embedded Business Intelligence to report, analyze and extract insights for cohort analysis
